L

Responsibility: F.H. Smith

Program: NBAR Extractor

Objective: To provide a new extractor that is easily installed, is more reliable and appears stronger than the current rivetless extractor.

Goals:

- o Extractor force against shell must not decline over a reasonable endurance life of the rifle.
- o Extractor must not interfere with bolt closing.
- o Extraction related malfunction rate less than M/700.

Stake:

- o Improved performance
- o Improved customer acceptance

Status: Two extractor designs are in the Model Shop to be fabricated.

Program

- o Fabrication complete

Timing:

- o Developmental testing
- o Decide which extractor to continue
- o Redesign
- o Design acceptance test
- o Check CY drawings
