Please take over completely the fabrication of the five focus panel show guns. You have been doing the work co-ordinating the activities on the three guns that I have been building, so you might just as well get the credit for building all of the guns.

You have both sheets outlining the rifle specs. There have been a few changes but I think you are aware of them.

In addition to the five rifles please put together an assortment of checkered stocks. Rather than checker the five panel rifles differently (which may skew any results) we will just show the checkered samples separately. We should have enough samples sitting around so that you don't have to make any new.

Randy
