Skip 700 7mm?

77 Ruger 270

⑨ Safety Location

R - easily accessible, convenient

S - better for lt. hand

w/ 70 can (el)
position of ~~5~~
not S

Least

R - easily moved accidentally (brush, trees etc)

S - not high enough to engage (too small)
not extended, not sure, too short throw
w/ scope + gloves hard to operate

⑧ Bolt knob

M - knurled oblong, used bit - no arguments knurling but 1 guy just prefers not to have it

1 guy doesn't know what his is, wouldn't make big difference least.

Slick ones are slippery

S - ④ feel, small, wet → slippery

Q - smallest

⑦ A) enclosed - cleaner gun, sealed ^(debris)

not sure what's on gun

exposed ③ - cocking indicator, safety aspect

cocking indicator too small to be easily noticed

Shape very unimportant B) plain round almost unimportant

slender scalloped

short scalloped

⑥ Bolt Release

④ BDL Location - hard to get to w/ gloves, felt that gloves no problem, take down only at home

④ Side tang - easy access

never want to remove when hunting

⑤ Confusion about bolt slug bolt lock before
 ① 1 bolt spent lose shell it was exploded

2 no need to be locked in fire position

3 ①

is an extra mechanism to fall up

need bolt lock on safe for safety aspect to keep bolt locked down

no one addresses unloading

③ location is fairly important

bolt plug - ⑥ easier w/ gloves on, poor design to small

front of safety - ② easier - with gun on fire hard to get to

④ Magazine

detachable - easier loading

floorplate - can ^{lose} forget magazine, no need to worry about floorplate

floorplate user prefers floorplate

no difference of look (w/ clip vs. floorplate)
clip vs floorplate not a big deal

③ Barrel Style

MR - smooth lightweight

MR ~~improved~~, didn't care for, looks expensive

② BDL - smooth - weight better ⑤ likes heavier look
heavier w/ shoots better wait walk

hammer works cuts glare, gives distorted look
tempering

likes look of slim barrel but picks heavier
barrel because of function

2 Receiver

T round ^{1 best}

Q round w/ integral mounts ^{1 best} -

R oct. ^{1 best} -

S oct w/ mounts.

1 Preference

T bigger forestock, rounded, good feel

Q squared forend, good pistol grip, not swept back
I preferred wht line spacers so that the close Q over T

prefer rounded forend tip over square or BDL

stocks should be checkered
