Fiberglass and Synthetic Stocks

The following is a list of manufacturers who we have contacted or received quotes from within the last 14 months.

- o Six Enterprises, San Jose, Calif. - sent us a M/700 ADL fiberglass stock to look at, has also quoted on a prototype thumb-hole stock, and is currently working on a quote for standard M/700 stocks. We have a catalogue and dealer's price list on hand.
- o Brown Precision Inc., Los Molinos, Calif - We have a M/700 ADL 7 x 57 made up in a Brown precision stock (fiberglass). Limited accuracy work has been done with this gun. They are also willing to quote on prototypes.
- o Answer Stocking, Whitewater, WI. - They make urethane short and long stocks and were working on fiber reinforced stocks. Their long stocks are limited to classic style only. Will quote on prototype work.
- o Fiberpro, San Diego, Calif. - They make fiberglass, kevlar, carbonfiber, or composite construction stocks. The Custom Shop has 4 fiberpro stocks, 2 fiberglass and 2 kevlar construction. Further investigation is needed.
