Customer service:

I have a .243 WIN. model 700.
The gun has been used only 2 or 3 times
because it belonged to my wife. This year
the gun was used by my son while
hunting. The gun went off 2 times
when the gun was taken off safety.
At a local gun shop I was told of
a recall of some guns over a problem
with the safety. I will list all identification
numbers starting at the front of the stock and
going toward the trigger.
