

CONFIDENTIAL

MONTHLY REPORT - SEPTEMBER 1991
TIM MCCORMACK

* The parts lists have been amended for the following:
addition of the wood grained stock to the model 700 KS,
adding left hand to the model 700 safari;

* I have started to prepare project justification data for adding a stainless steel version of the model 700 KS to the new products for 1992. If this will be offered in a production grade gun, I feel it is imperative that we have it available in the KS model. We want to be ready if it makes it to production, but can't proceed if it doesn't. A sample rifle has been assembled and shipped for photographs.

* The first engraved custom model 700 and two model 700 KS rifles have been shipped to the prince of Saudi Arabia. We met our schedule. Five more high grade guns are in the works.
