Subject: Tikka bolt plug

Jay,
Sorry for the delay in my response to your request, we have a Tikka here but not the same model. I could not find the magazine in the office, so I had to run out last night to get one. Although the model is different, as best i can tell the magazine picture and the gun we have here have the same bolt plug/receiver geometry.

Looking at their setup, we could duplicate their bolt plug, but cannot obtain their receiver geometry. We are locked into the receiver insert tang geometry, if we were to change the receiver insert at this time, it would definitely eliminate all possibilities for 2000 intro

You should have the slimmed bolt plugs today, feel free to file/carve to any geometry. Let me know what is the next step

Again, sorry for the delay,
Thanks
Mike
