Note: See page 31 for Rimfire Rifle specifications.

MUZZLELOADING RIFLES

# Model 700" Muzzleloaders — 100% Modern: 100% Remington.

Take away the ramfod and you barely know they re muzzleloaders. These black powder rifles are crafted on the same modern) proven bolt-action centerfile design of the most popular bolt-action rifle ever produced: the Remington Model 700. The Same cocking action. The same trigger mechanism. The same lock time. The same legendary out of the by cacourgey. The differences? A modified bolt and ignition system, and, of course the method of leading from the muzzle. Remington Model 700. Muzzleloaders. A new grafin muzzleloading rifle design and conting performance.

#### MODEL 700™ ML & MLS CAMO

We're adding an exciting new option to our .50-cal. Model 700" muzzleloaders; stocks covered with Mossy Oak" "Broak-Up" came pattern. All Model 700" Muzzleloaders have barrels rifled with a 1 in 28" twist. The breech is closed by a stainless-steel breech plug and nipple. In the modified polt, the conventional fitting pin is replaced by a cylindrical "hammer" that is cocked by bolt lift and released by pulling the trigger to strike a No. 11 percussion cap seated on the nipple. The lock time of 3.0 in diseconds is the fastest of any muzzleoader on the market. Suggested retail from \$405.

#### "Model 700" ML

The blued, satin-finished carbon steel barrel, action, and bolt are precision-sat in a black. The receiver is drilled a spot with magnum recoil pad. The receiver is drilled and fapped for standard Model 700° short-action scope industs. The remnod is recessed within the fore-end of the stock and firmly secured by a barrel band. Available in ,60 callber, Suggested retail is \$372.

#### Model 700™ MLS

The houreflective satin-finished stainless-steel barrel, receiver, and bolt are machined from 4.16 stainless steel for incomparable rust and corrosion protection—then precisely fitted in a fiberglass-reinforced synthetic stock. The remrod is neatly recessed in the stock and secured by a barrel band. The butt is fitted with a magnum recoil pad, while the receiver is drilled and tapped for standard Model 700 short-action scope mounts. Available in 150 and .54 calibers, Suggested retail is \$469.

CENTERFIRE RILLES

## The Model 700™ — Accuracy Built In, Not Added On.

No production hunting rifle beats the Model 700"'s out-of-the-box accuracy. In fact, there aren't many custom rifles that can beat it either. That's why over 80% of the competitive shooters at the NRA's long-range silhouette championships shoot a Model 700™. And why the winning shooter has used a Model 700™ in 10 of the last 11 years. It's available to you in every Model 700™ that comes out of the Remington\* factory. No special modifications, re-bedding, add-on devices or adjustments are necessary - just built-in accuracy you can count on every time you hunt.

#### Model 700™ ADL

ADL SYNTHETIC

The basic wood-stocked version of the Model 700", the ADL, delivers all the performance features of strength, durability, and accuracy, while sacrificing nothing in looks. À

COMMEMORATIVE RIFLES

# No. 1 Rolling Block Creedmoor — Remington Continues to Make History.

At the request of many American shooters, flamington is proud to bring back the Pamington Ro. I Rolling Block rifle in a mid-range Creedmoor style. And when we say we've compruing to make history, we mean it literally: this is not a replice, but a reintroduction of an original daily. In fact all barrel, receiver, and metallwork markings are reproduced exactly to original daily. In fact cations it has a 30° half-octagon, half-round tapered dairel, with 1-in 18° half at great as atting for exceptional accuracy. Of several rolling plock Creedmoor byte files this of a sixter particle with contemporary use. It's a great mid-range target rifle and a very confut contemporary use. It's a great mid-range target rifle and a very confut contemporary see.

#### A Great Design from 1875

Among the world's most notable rife designs none is more distinctly Amondan than the Reministra Bolt ag Block. This ternous version retains the historic look of case-colored receiver, integral trigger guard, and Schnobel rore end up. In complementing contrast are the niter-blue hangle set trigger, breechblock at distinutes, and the standard blued barret.

CUSTOM SHOP

# One-of-a-Kind Craftsmanship for the Discerning Sportsman.

Because there will always be sportsmen who love personally hand-crafted, meticulously built rifles and shotguns, there will always be the Remington® Custom Shop. There, 180 years of experience and tradition are in the hands of modern-day masters with continually refined skills in metalwork, rifling, stockmaking, engraving, inlaying, and meticulous hand-fitting and assembly. Returning to the Remington Custom Shop today, Eliphalet Remington would be proud to see guns individually hand-crafted the way he made the first one in 1816. And though he might be amazed at today's advanced designs, he'd also be proud that Remingtons continue to be the best of their day, and ahead of their time.

Whether it's for a true one-of-a-kind investment, production guns that demand extra refinement, or an upgrade to existing guns, the Custom Shop is ready to build your dream gun—and at a price that's affordable. You can call the Remington Custom Shop directly at 1 (315) 895 3288, or reach them through the Remington Consumer Information Center at 1 (800) 243 9700.

The entire action is assembled in the Custom Shop, and the berrel, receiver, and tells are all of 416 stainless steel with a glassia and definish. The ML Custom features a carbon-steel barrel and gray immeted thumbhale stock. Base price is \$3.55 for the ML Custom and \$896 for the MLS Custom.

# Remington® — The Skeet and Sporting Clays Specialist. In 1932, Remington developed the legendary Model 32, the first American-made over & under,

In 1932, Remington developed the legendary Model 32, the first American-made over & under, and the first shotgun designed specifically for skeet. Over the years, as preferences for action types have changed, Remington has continued to develop and refine great skeet guns. As sporting clays has become ever more popular, so has Remington's commitment to providing the quick-pointing, smooth-mounting, target-finding shotguns that the sport requires.

The Model 396" Skeet has the cleanest, straightest silhouette cround. The stock is formed from figured American walnut with a satiritinish and generous out checkering. Barrels and side rips are a pollshed, deep blued color, while receiver, side places, trigger guard, top lever and fore-end trim are set off in gray nitride coloring. Virtually all receiver surfaces are decorated with graceful scrollwork. Centered on left and right receiver panels are fine renderings of a pointer and a setter. Undernosth the handsome appearance is at the strength and reliability of a superb shooting machine.

#### Model 396™ Skeet

(OVER & UNDER)

The most modern 12-gauge over & under skeet gun available. An exceptionally strong modified underlock design permits a non-bulky, shallow receiver for slim, straight-pointing lines. Offered in a choice of 28" or 30" Chrome-Moly barrels with a 10-mm-wide, non-stepped, parallel rib. Barrels have lengthened forcing cones and are fitted for the interchangeable Rem" Choke system. Supplied with Skeet and Improved Skeet tubes. For comfortable control, the stock includes a wider target-style fore-end, larger-radius comb, and universal palm swell on the pistol grip. Stock dimensions are 11/4" at the comb, 21/4" drop at heel, and 143/1, " length of pull. Average weight is 71/2 lbs. Suggested retail is \$1,859.

#### Model 11-87™ Premier® Skeet

The Model 11-87" Premier Skeet brings autoloading reliability to competitive shooting. Like all our target guns, it has a beautifully figured American walnut stock and crisp-cut checkering for good control. The 26" Chrome-Moly vent rib barrel includes our interchangeable Rem" Choke system for optional use on sporting clays. Suggested retail is \$732. Note: The Model 11-87" Premier Skeet has a 23/4" chamber, is not pressure-compensated, and is set up to handle target and light field loads only.

#### MODEL 1100" SKEET

20-GAUGE SKEET

The most popular 20-gauge autoloading skeet gun in history is back: the legendary Model 1100" LT-20. Returned in its original tournament-grade form, it features a select satin-finished American walnut stock with extensive sharp-cut checkering. The one change is the addition of a versatile Rem" Choke system to its 26" vent rib target barrel, extending its use to upland hunting and sporting clays as well. Suggested retail is \$732.

New For 1997

#### VIODEL 396™ SPORTING

(OVER & UNDER)

pecifically designed for sporting clays competition. Chrome-Moly barrels in a another of 28" as \$1" lengths are factory ported and tapped with a 10-mm-wide parallel non-stepped with a former of the barrels have lengthened forcing contes, and include the choke-changing versatility of our Rem" Choke system in Skeet, Improved Cylinder, Light Modified, and Modified constrictions. Sun handling is aided by a wider, hand-filling force. end, larger-radius comb, and a universal paint swell in the platol grip. Stock dimensions are the same as the new Model 396" Skeet, and average weight is 7% ba. Select satin-finished American walnut and extensive fine-line engraving 1114 a banus of truly good looks. Suggested retail is \$1,993.

#### Model 11-87™ Premier SC

(SPORTING CLAYS)

With the most reliable and durable autoloading action ever designed, the Model 11-87" Premier Sporting Clays brings fettigue-reducing, low-recoil comfort to 12-gauge competition. Swift mounting is essured by a smooth-surface recoil ped with rounced toe end radiused heel. The fast-handling, light contour barrel includes a lengthened forcing code and 8-mm-wide rig with purp beads. Four individual Rem" Chokes in Skeet, Improved Cylinder, Light Modified, and Modified have constitutions discript marked on their no-wrench, fast-change knurled extensions. Dimensions of the tournement-grade American walnut stock are specially adapted to sporting clays. Suggested retail is \$745, Note: The Model 11-87" Premier Sporting Clays has 23/4" chamber, is not pressure-compensated, and is set up to hendle teriest and light field loads only.

## ODEL 11,87" PREMIER' SC NP

(SPORTING CLAYS NICKEL PLATED)

The new Model 11-87 Premiar Sporting Clays NP features a beautiful nickel-plated receiver in a soft low-luster tone and is extensively decleated with Regulation's custom-quality, fine-line engraving. The ported, 30" barrel further reduces recoil sensation of health as barrel jump on repeat shorts. With a satin-finished tournement-grade American walnut stock, the Model 11-57 Premier Sporting NP also includes four newly designed sporting clays choke tubes in Skeet, improved Cylinder, Light Spotlified and Modified, with knurled extensions for fast and easy interchangeability. Suggested retail is \$793. Note: The Access 11-67" Premier Sporting Clays Nickel Plated has 21 chamber, is not pressure-compensated, and is set up to health surget and light field loads only.

#### Model 1100™ Sporting 28

For 28-gauge Sporting Slave sompatition, Remington has returned to what many competitors believe to be the finest 28-gauge clay target gun ever made — the Model 1100" its original American well un tournement-grade spock has a gloss finish and sporting recoil pad. One significant change is that the 25" vent the served new sponses with four interchangeable Rem" Choke tubes in Skeet, Improved Cylinder, Light Modified and Vipolified constrictions The resulting versatility also permits its use for both skeet and upland bird-hunting. Suggested setall is \$748.

Within two years of the first national trapshoot in 1900, Remington had its first trap gun, a Model 1900 side-by-side double modified specifically for the sport. As in Skeet and Sporting Clays, Remington has played a major role in trapshooting from the very beginning, developing shotguns with great reliability, pointability, and patterning. Our 1997 trap gun offering continues the tradition.

Model 90-T™

Every element of the Model 90-7° single-barrol traingum was designed for tournament composition. Stocklines and dimensions virtually look shooter and gun into a single unit. Its unique distribution of mass areatos the correct balance for trap torgets and the lowest perceived record of any break-action single currently made. A 34" everbored barrel with lengtheted tording cone and fixed full choke delivers target-smoking pattern uniformity and density. The crisp, no-creep trigger with under three miliserands of look time provides instant, tinget-touching response, it has the strength and durability for a lifetime of high-volume shooting and easy mainter and ovito removable side plates and a drop-out trigger mechanism. Suggested retail from \$3,199.

#### MODEL 90-T™ HPAR

(HIGH POST ADJUSTABLE RIB)

All the performance and durability features of our standard Model 90-T" are included in this high rib version that combines an adjustable high post rib with an adjustable comb stock. Four different rib elevations permit point-of-impact variations from a standard 60/40 pattern height to a plus 10" high setting at 40 yerds. Comb height can be simultaneously adjusted to retain desired point of impact. Suggested retail is \$3,992.

#### Model 11-87" PREMIER TRAP

The Model 11-87" action brings the light-recoil comfort of a gas-operated autoloader to tournament trapshooting. Along with that comes the versatility of one gun for 16-yerd singles, handicap, and doubles targets. Supplied with satin-finished American walnut Monte Carlo stock, 30" vent rib overbored barrel, and three Rem" Choke Trap Tubes. In addition, both receiver panels are decorated with Remington's new fine-line engraving process. Suggested retail is \$754. Note: All Model 11-87" Premier' target guns have 23/4" chambers, are not pressure-compensated, and are set up to handle target and light field loads only.

#### MODEL 870™ TC

Because trapshooting and pump guns are virtually synonymous, nothing could be more appropriate than the return of one of the most popular, record-setting trap guns of all time — the famous Model 870" TC. Back with it are all its features — tournament-grade satin-finished American walnut stock in Monte Carlo style; the strong, reliable, smooth-shucking Model 870" action; overbored 30" vent rib barrel with 23%" chamber; and overbore-matched, interchangeable Trap Rem" Chokes. In addition, both receiver panels are decorated with Remington's new fine-line engraving process. Suggested retail is \$647.

# Model 11-87™ Premier® — The Lines and Looks of a Champion

All that a wingshooter could want in an autoloader is here: strength, versatility, durability, reliable performance, and superb handling. It gives nothing away in looks either: slim, graceful stock lines and the elegance of nicely figured American walnut in a satin or high-gloss finish. A special Remington engraving process adds smooth fine-line scrollwork to both sides of the receiver. For those who want to own just one great shotgun, the Model 11-87" Fremier's the choice.

Model 11-87" Gas Operating System Nickel-plated gas piston and piston seal The patented self-cleaning pressure-compensating gas system enables dependable operation with light 23/4" loads to heavy 3" magnums gazine tube

#### MODEL 1100™ SYNTHETIC

(12- AND 20-GAUGE)

All the features of the world-famous Model 1100" autoloader in 12- or 20-gauge are now available with the workhorse strength and lifetime durability of a synthetic stock. This is the "go anywhere, go anytime" Model 1100", completely at home in your cabin, canoe, or pick-up. Vent rib barrels are 28" in 12-gauge, 26" in 20-gauge, and are fitted with a Modified Rem" Choke. Suggested retail is \$492.

## 

#### Model 1100" LT-20 Synthetic FR RS

(20-GAUGE FULLY RIFLED, RIFLE-SIGHTED DEER GUN)

This Model 1100" 20-gauge synthetic comes with a 21" fully rifled barrel with rifle sights and 23"," chamber. As an added benefit, owners of these Model 1100" deer guns can easily increase their versatility by adding extra barrels for clay target shooting or bird hunting. Suggested retail is \$475.

#### Model 1100™ Synthetic FR CL

(12-GAUGE FULLY RIFLED, CANTILEVER DEER GUN)

Our new Model 1100" deer gun is fitted with a 21" fully rifled barrel with Remington's cantilever scope mount system. With its fiberglass-reinforced synthetic stock, the gun has standard 23\(^3\)" chambers. For the Model 1100" enthusiast, this is the perfect opportunity to take advantage of exceptional slug accuracy with the combination of fully rifled barrels and modern slugs such as Remington's Copper Solid". Suggested retail is \$585. Note: Scope and rings not included.

PUMP ACTION SHOTGUNS

# The Model 870™ Wingmaster® — A Veteran That's Still Ahead of Its Time.

If the Model 870" Wingmaster were introduced today, it would be hailed as a major advancement in pump-action shotgun design - the ultimate in strength; durability, silky-smooth action, and sleek classical lines. Yet this remarkable shotgun has been around for almost half a century. and has become the best-selling shotgun of *any* action type in history, with over six million made. Most of these owners are first time users, still shooting their original 870. That should tell you something.

Just ask Rudy Etchen, one of this century's greatest competitive shotgunners. In 1950, Rudy took a brand, new Model 870 and broke the first registered 100 straight ever at trap doubles with a pump gun at the Grand American Trap Championships: In 1982 years later—he repeated the feat with the same gun. He's still shooting it. Rudy's not sure how many hundreds of thousands of shells he's shucked through his Wingmaster. But as Bob Brister recently wrote. About the only thing Mr. Rumpgun Rudy Etchen hasn't been able to do with his 46-year-old Remington 870", is wear it

out "\*\* The same thing can be said about every Model 870" — the proof is that many of them, are now in the hands of a third generation.

Pumping Steel," by Bob Brister, 🖫 🖟 Field & Stream: August, 1995

#### Model 11-87 SPS with Fully Rifled Cantilever Scope Mount Deer Barrel

This is the shotgun system that has revolutionized slug shooting, providing rifle-like repeat shot accuracy previously unattainable with slugs. A sturdy, nonreflective synthetic stock has ax-handle toughness. The rigid cantilever scope mount is attached to the barrel, guaranteeing permanent zero, and extends back over the receiver for natural, quick-sighting eye relief. And a Monte Carlo stock further speeds scope alignment. Finally, the fully rifled barrel delivers all the accuracy potential of Remington's highly concentric, ballistically balanced Copper Solid" slugs. And a simple barrel change can convert this gun to use for upland game or waterfowling. Suggested retail is \$7.52. Note: Scape and rings not included.

Model 11-87™ SP

DEER GUN

(WALNUT STOCK)

This is a truly versatile big-game gun with traditional walnut stock. The 21" barrel is supplied with adjustable iron sights and both Rifled and Improved Cylinder Rem" Chokes to accommodate either slugs or buckshot. Use of an optional Turkey Extra Full Rem" Choke creates an easy-carrying, precision-sighting turkey gun. And an optional extra barrel can convert it to an upland or waterfowl gun. Both wood and metal have nonreflective finishes. Includes sling swivel studs and padded Cordura sling. Suggested retail is \$651. Note: 21" Model 11-87" deer barrels are not pressure-compensated. Not for use with target or light field loads.

Model 11-87™ SPS Fully Rifled Deer Gun

Here's an autoloading deer gun that comes up fast for quick shots in close quarters. Featuring a synthetic stock, this Model 11-87"

has a fully rifled barrel with open sights. Matched with our Copper Solid" slugs, it delivers pinpoint accuracy on demand. Padded Cordura sling and swivel studs are standard. Suggested retail is \$692. Note: 21" Model 11-87" deer barrels are not pressure-compensated. Not for use with target or light field loads.

#### Model 11-87™ SPS

There's no more rugged, reliable workhorse for the toughest hunting conditions than a Model 11-87" SPS. This

is the light-recoiling autoloader with a dirt-defying gas system that will run through

shells all day long without a hitch. Like all our SPS guns, it is fitted with a weather-proof synthetic stock with black matte finish, while all metal surfaces have been bead-blasted and blued to eliminate glare. Available in a choice of 26" or 28" vent rib barrels with three interchangeable Rem" Chokes. Includes sling swivel studs and padded Cordura® sling. Suggested retail is \$670.

#### Model 11-87™ SP

(WALNUT STOCK)

The Special Purpose shotgun of traditional American walnut with positive cut checkering, while retaining the concealment advantages of our SP

line. There's not a hint of reflection from the satin wood finish or the black matte surface of exposed metal. Supplied with either 26" or 28" vent rib barrels, each with twin beads and interchangeable Improved Cylinder, Modified, and Full Rem" Choke tubes. Add an extra rifle-sighted deer barrel or rifled Rem" Choke tube to convert it to a slug deer gun. Includes sling swivel studs and padded Cordura® sling. Suggested retail is \$670.

#### Model 870™ Marine Magnum

A highly durable and versatile utility gun that resists corrosion on land or water. Electroless nickel plating covers all metal of the Model 870" Marine Magnum includ-

ing the inside of the barrel and receiver. The synthetic stock has generous checkering for positive control and is impervious to moisture. Supplied with 18" Cylinder barrel with single-bead front sight, six-round magazine, padded Cordura® sling, and swivel studs. Suggested retail is \$500.

★ New For 1997

Model 11-87™ / 870™ SPS-T CAMO

This year, our Model 11-87" and Model 870" (pictured) Special Purpose Synthetic Turkey guns will be disguised with new RealTree® X-tra Brown, one of the most versatile three-dimensional camo patterns made. This new camouflage will completely cover the receivers, barrels, stocks, and magazine caps of both guns, including the exposed magazine tubes of the Model 870". The 21" vent rib barrel minimizes gun movement, points quickly, and slips easily beneath low branches when carried vertically. Twin bead sights, tight constriction Turkey Super Full Rem\* Chokes, and matching padded Cordurao sling are standard. Suggested retail for the 11-87" is \$770 and \$511 for the 870".

new Mossy Oak® Break-Up pattern in 1997. Receiver, barrel, butt-stock, fore-end, and magazine cap are all completely camouflaged, as is the exposed magazine tube on the Model 870"(pictured). Both guns have 26" vent rib barrels with Improved Cylinder, Modified, and Full Rem" Choke tubes, and come with sling swivel studs and padded Cordura® sling. Suggested retail for the 11-87" is \$557, and \$496 for the 870".

\* New For 1997

MODEL SP-10™ MAGNUM CAMO America's only gas-operated 10-gauge shotgun. It's the perfect gun for

high-flying honkers and the toughest turkey shots, delivering up to 34% more pellets in the target area than a standard 12-gauge, yet with less recoil than many 12-gauge Magnums. Available with 26" or 30" vent rib, Rem" Choke barrels. The American walnut stock has a satin finish, and all exposed metal has a nonreflective matte finish. Also available is the SP-10" Magnum Camo with a fast-pointing 23" vent rib turkey barrel, covered this year in new Mossy Oak® Break-Up camouflage. Interchangeable Rem™ Chokes include Turkey Extra Full, Full and Modified Includes sling swivel study and padded Cordura® sling. Suggested retail for SP-10' Magnum is \$1,054, and \$1,145 for the SP-10" Magnum Camo.

Model 11-87" / 870" SPS-T

Model 11-87" and Model 870" (pictured) SPS-T turkey guns makes them look like just another tree branch. Twin beads on their fast-pointing 21" vent rib barrels will help you line up quickly on a longbearded Tom. And our Turkey Super Full Rem™ Choke delivers the dense patterns that will ensure a Thanksgiving dinner. Add a Rifled Rem™ Choke tube, and you can turn these rugged, synthetic-stocked shotguns into sharpshooting deer guns as well. Includes sling swivel studs and padded Cordura® sling. Suggested retail for the 11-87" is \$684, and \$425 for the 870".

PUMP ACTION SHOTEUNS

# The Model 870™ Express™ — The All-American Pump Gun That's All Business.

Our Model 870™ Express™ is America's pump gun. It brings performance-oriented hunters the best of both worlds — beneath its no-nonsense, ready-for-work exterior lie the same quality of materials, careful manufacture, and lifetime reliability as in our standard Model 870™ Wingmaster®, the pump gun without peer. But it also delivers this to shooters at a truly economical price. As a result, it is not only the "Best Buy" version of the best-selling shotgun ever designed, it's the "Best Buy" of shotguns, period. And it earns this position with a variety of choices that span the spectrum of shotgun applications.

#### MODEL 870™ EXPRESS™ TURKEY

A perfect turkey gun with the nonreflective, flat-finish concealment advantages on both stock and exposed metal of our Express line. Available in 12-gauge, with 21" vent rib turkey barrel that carries easily beneath overhanging branches and minimizes movement on a stand. A Turkey Extra-Full Rem Choke tube provides the exceptionally dense patterns needed for taking a wary Tom. Suggested retail is \$305.

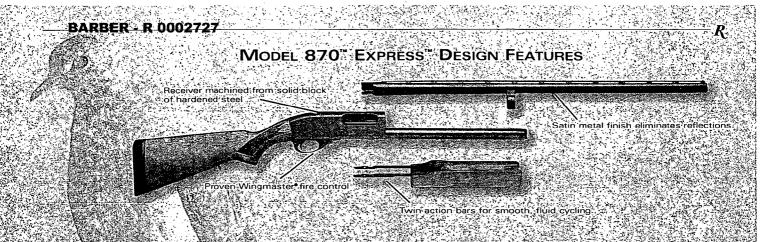

#### Model 870™ Express™ 20-gauge Youth Gun

Sized for smaller shooters with a 13" length of pull. Offered in a choice of a well-balanced 21" vent rib barrel with a Modified Rem" Choke for birds, or a 20" fully rifled, rifle-sighted deer barrel (pictured) to match up with the accuracy of our 20-gauge Copper Solid" sabot slugs. It features a handsome hardwood stock with positive checkering and low-luster finish. Suggested retail is \$292 with 21" vent rib barrel, and \$325 for 20" fully rifled barrel.

#### MODEL 870" EXPRESS" HD

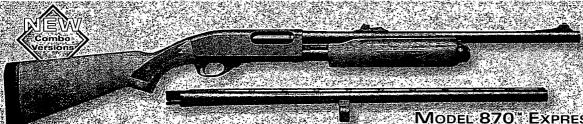

An ideal utility and home defense gun. With 18" Cylinder choke barrel and single front bead sight. An excellent choice as a permanent camp shotgun or as a foundation for adding the versatility of additional extra barrels. Suggested retail is \$292. Note: the Model 870" Express" HD is intended for personal use and will not accept law enforcement accessories.

#### PROVEN DEPENDABILITY AT AN AFFORDABLE PRICE

You can pay more for a pump gun, but for functional reliability and lifetime durability, you can't buy a better one than a Model 870" Express". The reason is simple. It's built on the basic action of the best-selling, most tested shotgun ever made, the legendary Model 870" Wingmaster®. It's the same gun, but a bit less fancy. Just as strong, just as reliable, and just as durable - with an action that cycles just as smoothly. Nor are your choices limited. It's offered with a wide selection of barrel configurations, a Rem" Choke system, and in 12-, 20-, 28-ga. and .410 bore. All wood and metal surfaces have a nonreflective, non-revealing finish. The 12-gauge vent rib field gun is offered in both wood and synthetic stocked versions. You can count on it today, tomorrow, and someday, in your grandson's hands.

#### Model 870 Express Combos

in 1997, we're offering two new Model 870. Express, Combo cross-over packages for both birds and deer, available in both-li2 and 20-gauge, they include a 26, went rib barrel with Modified Rem. Choke tube and a 20% fully rifled sighted deer barrel. These complement our existing 12, and 20-ga; composithat feature a 28, vent rib Rem. Choke field. barrel and 20% rifle: sighted improved Cylinder deer barrel: Suggested retall from \$383

## Model 870" Express Deer Gun

The affordable pump-action deer gun for hunters who prefer adjustable open sight stock promotes fast sight alignment. Available with choice of either 20% fully rifled barrel for dard slugs, or 20° improved Cylinder barrel for rifled slugs or buckshot. Suggested retail is \$287%

# Model:870 Express SMALL GAUGE

There's no better buy in a lightweight, fast-handling field gun than these small-gauge version of lour Model 870". Express: Fully checkered wood stock with recoil pad (20-gauge only) 4. bore and 28-gauge have 25 yent rib barrels and Modified Fixed choke on the 28-gauge and Full on the 410. The 20-gauge version is offered with your choice of either 26, or 28, went rib barrel with Modified Rem

Note: See page 29 for Express" shotgun specifications

Fitting Standard Barrels on Light Contour Shotguns - The fore-ends on our new Light Contour Model 11-87" shotguns are shaped to follow the curve of the slimmer-profiled LC barrel, which means that a standard vent rib or deer barrel cannot be fitted to your gun unless you do one of two things: have your LC fore-end wood opened up by a competent gunsmith or stockmaker; or purchase a standard profile fore-end from our Arms Service Division by writing to: Arms Service Division, Remington Arms Co., 14 Hoefler Ave., Ilion, NY 13357

NOTE: LT-20, 20-gauge Lightweight barrels (4400 Series) will not fit pre-1977 20-gauge Lightweight or standard 20-gauge Model 1100° shotguns. (Refer to parts list for pre-1977 barrels.) \*Manufacturer's Suggested Retail Price.

## PLEASE NOTE THE FOLLOWING AMMUNITION RECOMMENDATIONS FOR USE WITH THE MODEL 1100" STEEL SHOT BARREL.

When used with Model 1100" Magnum shotguns: - Use 2½" Magnum or 3" Magnum steel shotshells - Use 2½" Magnum or 3" Magnum lead shotshells.

When used with Model 1100" non-Magnum shotguns:

- Use 2½" Magnum or 3" Magnum steel shotshells.

- Use 2½" Magnum lead shot-shells. Do not use 3" Magnum lead shotshells in non-Magnum Model 1100" shotguns, as this will cause extra wear and decrease the life of the gun.

Specially designed for use in Remington overbored trap barrels only. Will not produce satisfactory patterns in standard-bore barrels.

\* New For 1997

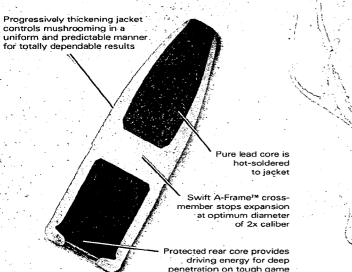

CENTERFIRE RIFLE

# Safari Grade Ammunition — When the First Shot You Take May Be the Only Shot You Get.

Whether you hunt whitetails with a .270, or cape buffalo with a .458, you want your first shot to be the only one you need. That's why we start with Swift A-Frame™ dual-core bullets, for their virtually 100% weight retention. All components receive multiple individual inspections. Every primer is pre-inspected for ignition reliability. Each round is receiver-gauged, and cases are nickel-plated for reliable feeding and extraction. High ballistic coefficients and bullet concentricity deliver excellent first-shot accuracy, while outstanding on-game performance keeps you from needing a second.

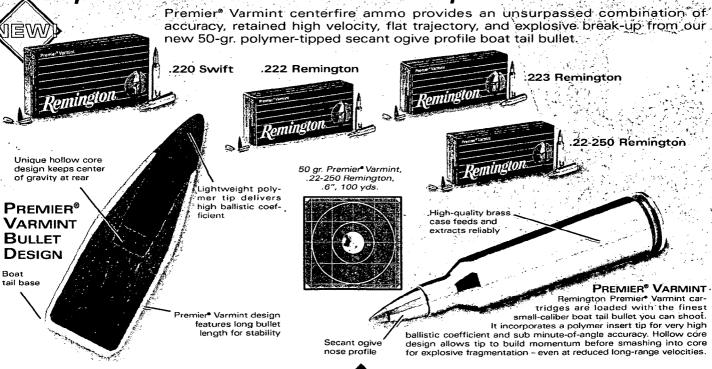

TOTALLY DEPENDABLE EXPANSION
Produced by recovery from ballistic gelatin, the above
progression of a .30-06 Spgfld. Swift A-Frame™ bullet
shows typical controlled expansion to 2x caliber with
wirtually no weight loss.

MEDIUM-TO BIG-BORE CHOICES

Remington Safari Grade ammunition is now produced in a wide selection of medium- to big-bore calibers; including .270 Win., 7mm Remington Magnum, 30-06 Spgfld., 300 Win. Mag., 300 Wby. Mag., 338 Win. Mag., 375 H&H Mag., 416 Remington Magnum, and .458 Win. Mag.

# Premier® Varmint Ammunition — Superior Performance and Explosive Power.

# Remington® Centerfire Rifle Ammunition — A History of Better Bullets Lives On.

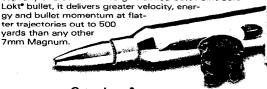

Core-Lokt®. Bronze Point Power-Lokt®. Legendary names in bullet design, all from Remington. From the beginning, Remington has been the leading innovator, from bullets to primers, cartridge brass to powder blends. This year the history continues with the introduction of the brand-new .260 Remington, highly effective for medium game; the 7mm STW, which outperforms any other 7mm Magnum produced; and a new .223 Remington Match loading with a heavyweight 62-gr. hollow point bullet.

#### 7MM STW (SHOOTING TIMES WESTERNER)

Designed by gunwriter Layne Simpson in 1988, the 7mm STW is based on the original 8mm Remington Magnum necked down to 7mm (28 caliber). With its large case capacity and our new 140-gr. Pointed Soft Point Core Lokt\* bullet, it delivers greater velocity, ener-

ter trajectories out to 500 yards than any other 7mm Magnum.

7mm STW, 140-gr. PSP, .9", 100 vds.

CORE-LOKT SOFT POINT BULLET

The original standard that stays together on impact, expands in a controlled way, and mushrooms uniformly to nearly 2X original diam-

range hunting with high energy and velocities at long distances. Rapid expansion is conrolled to optimum limits.

case to 26 caliber and top it with our new 140-gr. Pointed Soft Point Core-Lokt® bullet. In terms of game-stopping bullet momentum.

the .260 Remington actually sur-passes the .270 Win, with a 130-gr. bullet at 200

#### CORE-LOKE POINTED SOFT POINT BULLET

Flatter trajectory, higher down-range velocity and energy 2X expansion of caliber diameter. Bes big game hunting.

#### POWER-LOKT® HOLLOW POINT BULLET

Varmint and small-game bullet with sub minute-ofangle accuracy. near-perfect concentricity and balance of cusbullets.

#### .223 REMINGTON MATCH

When accuracy is the prime consideration, shoot our new .223 Remington Match loading with a heavyweight 62-gr., hollow-point bullet. A proprietary step in bullet swaging provides unsurpassed bullet concentricity that delivers groups of .8" at 100 yards.

# Extended Range Ammunition — Reaching Out with Match-Grade Accuracy.

For match-grade accuracy in big-game hunting, Extended Range bullets are constructed with a proprietary manufacturing process that delivers near-perfect bullet concentricity and uniform jacket wall thickness. Their higher ballistic coefficient helps retain greater down-range velocity. For superior performance on game, the jacket design is precision-tailored to the velocity range of each caliber, creating the right balance of bullet toughness and mushroomability.

TAIL BULLET
The boat tail heel of these bullets minimizes drag, and their aerodynamic nose profile creates an extremely high ballistic coefficient that preserves velocity and flattens trajec tory. Precise concentricity makes them one of the most accurate factory-loaded game bullets available.

These tables were calculated by computer. A standard scientific technique was used to predict trajectories from the best available data for each round. Trajectories shown typify the ammunition's performance at sea level, but note that they may vary due to atmospheric conditions and the equipment.

All velocity and energy figures in these charts have been derived by using test barrels of indicated lengths.

Ballistics shown are for 24" barrels, except those for 30 carbine, 350 Remington Magnum and .44 Remington Magnum, which are for 20" barrels. These barrel lengths were chosen as representative, as it's impractical to show performance figures for all barrel lengths.

The muzzle velocities, muzzle energies and trajectory data in these tables represent the approximate performance expected of each specified loading. Differences in barrel lengths, internal firearm dimensions, temperature, and test procedure can produce actual velocities that vary from those given here.

#### Centerfire Rifle Velocity vs. Barrel Length.

2000-2500	• . •	10
2500-3000	* •	20
3000-3500	•	30
3500-4000		40

- Determine how much shorter, or longer, your barrel is than the test barrel.
- In the left column of the above table, select the muzzlevelocity class of your cartridge.
- To the right of that class, read the approximate change in velocity per inch of barrel length.
- Multiply this number by the difference in the length of your barrel from that of the test barrel.
- If your barrel is shorter than the test barrel, subtract this figure from the muzzle velocity shown for your cartridge.
- If your barrel is longer, add this figure to the muzzle velocity shown.

The trajectory figures shown in these ballistic tables are the rise or drop, in inches, of the bullet from a direct line of sight at selected yardage. Sighting in distances have been set at 100 to 250 yards.

The line of sight used is 0.9" above the axis of the bore. This height is common to iron sights and low-mounted scopes.

The trajectory tables can also be used for rifles with high-mounted scopes, that is,  $1\frac{1}{2}$ " above the axis of the bore. The difference in drops at even the extreme 500-yard range is not significant enough to negate the figures shown.

Since the rise or drop figures shown at the stated yardage are points of impact, you must hold low for positive figures, high for negative figures.

Many shooters who use the same cartridge often find it helpful to commit the rise and drop figures for that cartridge to memory, or tape them to their rifle stock. That way, they know instantly the right "hold" as soon as they estimate the target's range.

Specifications are nominal. Ballistics figures established in test barrels. Individual rifles may vary from test-barrel specifications.

- Inches above or below line of sight. Hold low for positive numbers high for negative numbers.
- † 280 Rem. and 7mm Express\* Rem. are interchangeable.
- Interchangeable in 244 Rem.
- § Subject to stock on hand.
- Bullet does not rise more than 1" above line of sight from muzzle to slighting-in range.
- Bullet does not rise more than 3" above line of sight from muzzle to sightling-in range.
- NOTE: 0.0 indicates yardage at which rifle was sighted in

### VENTED TEST-BARREL BALLISTICS

This Remington® patented, industry-accepted method provides data that more precisely reflect actual use of revolver ammunition. It considers cylinder gap, barrel length, powder position, and cylinder gap, barrel length, powder position, and production tolerances. Although our final values differ from conventional figures, the ammunition is unchanged. Key elements of our patented procedure include: (a) horizontal powder orientation; (b) cylinder gap: .008"; (c) barrel length: 4".

### INTERCHANGEABILITY CHART

Cartridges within groups shown are interchangeable. Other substitutions should not be made without specific recommendation of the firearms manufacturer since improper combinations could result in firearm damage or personal injury.

NOTE A: "High-speed cartridges must not be used in revolvers only in rifles made especially for them.

NOTE B: Ammunition with (+P) on the case headstamp is loaded to higher pressure. Use only in firearms designated for this cartridge and so recommended by the gun manufacturer.

NOTE C: Not for use in revolvers chambered for 32 S&W or 32 S&W Long.

NOTE D: All 38 Special cartridges can be used in 357 Magnum revolvers but not conversely.

NOTE E: 9mm sub-machine gun cartridges should not be used in handguns.

NOTE F: 44 Russian and 44 S&W Special can be used in 44 Remington Magnum revolvers but not conversely.

NOTE G: Not to be used in Win, M-66 and M-73.

Specifications are nominal. Ballistics figures established in test barrels.
Individual rifles may vary from test-barrel specifications.

\*Inches above or below line of sight. Hold low for positive numbers, high for negative numbers.

§ Subject to stock on hand.

Bullet does not rise more than 1" above line of sight from muzzle to sighting-in range.

Bullet does not rise more than 3" above line of sight from muzzle to sighting-in range.

NOTE: 0.0 indicates yardage at which rifle was sighted in.

### AARBEAL KINTIGA

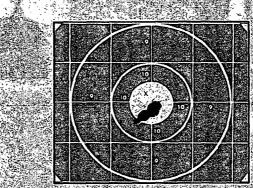

PISTOL & REVOLVER

# Remington<sup>®</sup> Pistol & Revolver Ammunition Tailored for Your Specific Needs.

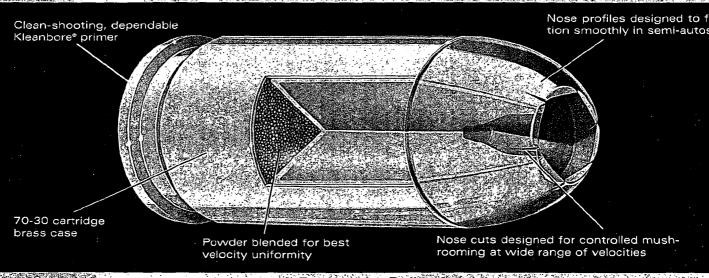

Remington's exceptionally broad line of handgun ammunition covers a comprehensive ranger of calibers, bullet weights, and bullet styles. Why? Because there are more end-use applications than in any other category, and each loading is designed for a very specific purpose. Combine the quality of Remington components with Remington's superior performance, and it's easy-to see why Remington is the first choice for so many handgunners

### PROVEN ACCURACY FROM ALL OF OUR HANDGUN CARTRIDGES

Every cartridge we produce carries every ammunition that shoots straight hit Lang feeds reliably From perfor ce-engineered Coppers lackets an

### acketed Hollow Point

Milliength jacket and hollow-point truction provide controlled expansion with penetration while assuring reache function in autoloading pistols

### Semi Jacketed Hollow Point Features a unique scalloped jacket design engineered to combine optimum expansion with controlled penetration for maximum energy transfer.

### d Hollow Point

expanding lead bullet that's ideal for situations partier penetration isn't a necessity.

### A Remington Bullet for Every Handgunning Need

Exposed lead soft point provides deeper penetration with less expansion than semi-jacketed hollow points.

### Wadcutter Match

For precise target shooting and easier scoring, our Targetmaster wadcutter delivers superior accuracy and clean, sharp paper-cutting performance.

### Semi-Wadcutter Lead Bullet

A hard-hitting lead bullet with clean wadcutter definition on paper targets.

### Full Metal Case

A general-purpose bullet for all autoloading pistols — assures reliable feeding and function:

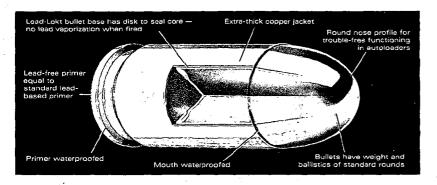

### ead Round Nose

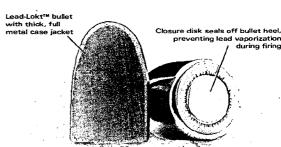

### Remington<sup>®</sup> Leadless<sup>™</sup> P&R Ammunition — Reduced Lead, Great Performance.

With Remington Leadless<sup>™</sup>, airborne lead-based residue at the shooter's position is reduced over 99%, while the lead-free primer and totally encapsulated Lead-Lokt<sup>™</sup> bullet combine to duplicate the ballistic performance of comparable standard ammunition.

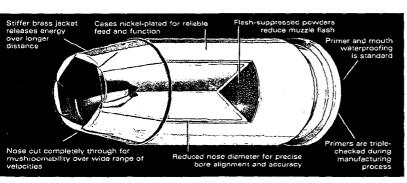

### Leadless" Totally Encapsulated Handgun Ammunition

### Remington<sup>®</sup> Golden Saber<sup>™</sup> HPJ — The Most Effective Handgun Ammo Ever.

Golden Saber™ High Performance Jacket (HPJ) handgun ammo showcases Remington's continuing advances in bullet technology. No other handgun cartridge offers so many high-performance features for home security and law enforcement applications.

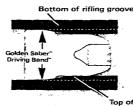

MATCH ACCURACY, DEEP PENETRATION, AND MAXIMUM EXPANSION WITH VIRTUALLY 100% WEIGHT RETENTION.

Fired Golden Saber\*bullet showing Driving Band contact area

### THE DRIVING BAND\* MAKES THE DIFFERENCE

The bullet diameter directly ahead of the Driving Band" is reduced from groove to bore diameter, so the bullet is precisely aligned before the Driving Band" engages the rifling. The result: match-grade accuracy and reduced barrel friction that conserves velocity.

Top of rifling land

.45 ACP BJHP (+P) 185-Gr.

### PISTOL & REVOLVER

# Core-Lokt® Handgun Hunting Ammunition — A Higher Level of Handgun Hunting Performance.

With a revolutionary advance in bullet design, Remington gives the handgun hunter the same game-stopping performance found in our legendary Core-Lokt® centerfire rifle ammunition. This handgun ammo has it all: exceptional accuracy, rapid but controlled expansion, and deep penetration with near-total weight retention.

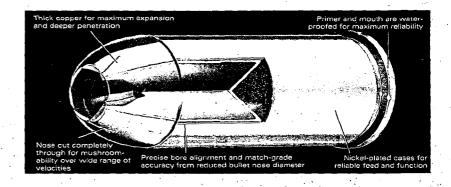

Core-Lokt® .44 Remington Magnum Bullet

Core-Lokt® .357 Magnum Bullet

### CENTERFIRE COMPONENTS

## Load Your Own with the Best — Remington® Factory Components.

When you reload with Remington factory components, you get the same high quality we use to make our factory rounds. Our cartridge cases are drawn from specially alloyed brass for exact internal volume and resistance to stretching and brittleness. Primer pocket tolerances at .001". Closely monitored case neck annealing assures easier re-sizing and greater reloading life. Primers feature the finest subcomponents assembled to exceptionally precise tolerances, with each lot 100% visually inspected and sub-

Primer cup dimensions controlled to 4 decimal places

Priming mix reliability from -20°F to 150°F

Unique, tripod-shaped anvil creates larger "sweet spot" — even with off-center firing pin strikes

jected to critical ballistic tests. In short, we make the finest factory loads with the finest components why not include the same quality in your reloads?

\*Will not chamber in .357 Mag. or .38 Special handguns. ‡Ammunition with (+P) on the case headstamp is loaded to higher pressure. Use only in firearms designated for this cartridge and so recommended by the gun manufacturer. §Subject to stock on hand. (A) Adapted only for .38 Colt Super and Colt Commander automatic pistols. Not for use in sporting, military, and pocket models.

DEER SILVIGE

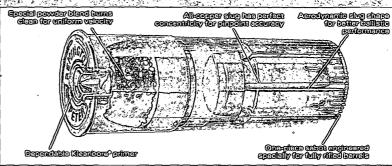

### Premier® Copper Solid" Sabot Slugs — The Ultimate in Accuracy and Power.

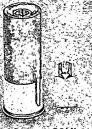

The slugs that deliver 2!/2" groups at 100 yards through our fully rifled barrels. In the slug nose, precise cuts around a hollow cavity create four separate betals. On impact, they expand to over 2X slug diameter, then break off to form additional wound channels. The slug base continues to penetrate with devastating effects. The result game that's anchored quickly and cleanly.

### Slugger® & Reduced Recoil Rifled Slugs — Field Proven to Fill Your Freezer.

### SLUGGER® RIFLED SLUGS

Always in the forefront of deer slug technology, we recently redesigned our 12-gauge Slugger\* Rifled Slug for a 25% improvement in accuracy. Also, at 1760 fps muzzle velocity, our 12-ga. Magnum slugs shoot 25% flatter than regular 12-ga. slugs.

### REDUCED RECOIL RIFLED SLUGS

In 1997, we're introducing a 12-gauge, 23/4" loading that delivers a 1-oz, rifled slug at a muzzle velocity of 1200 feet per second with a 43% recoil reduction from a comparable standard load. At 50 yds., it has the same energy as a standard 20-ga, rifled slug, and 14% more at 100 yds.

**BUCKSHOT** 

### Remington<sup>®</sup> Premier<sup>®</sup> Buckshot — The Best Just Got Better.

We've upgraded our 12-ga. Premier® Buckshot line with Power Piston® wads, providing protection against pellet deformation upon firing once available only with smaller pellet loads. All Premier® Buckshot is hardened with 3% antimony, then nickel-plated for additional hardness — the only buckshot to get this dual hardening process. You get patterns 25% tighter than normal buckshot loads. And all Premier® Buckshot shells are mouth-waterproofed. They're packed in 5-round boxes.

Power Piston® wad for protection against pellet deformation on firing, resulting in 25% tighter patterns

PREMIER® BUCKSHOT

graded for extremely uniform roundness and smooth surface

Pellets formed and

Polymer buffering cushions pellets from deformation

Nickel-plating improves roundness, adds hardening, and allows truer flight

STEET SHOTSHELLS

# Nitro-Steel™ — The Power and the Reach When the Going Gets Tough.

Unprotected steel shot

Rustless" steel, zinc-galvanized to prevent corrosion and "clumping"

Make the most of the best waterfow! hunting in decades by shooting Remington steel with state-of-the-art design that returns waterfowling effectiveness to pre-steel days. For tough goose hunting or when you need to reach out, Nitro-Steel Magnum is

the shell of choice.
Our hulls permit high load capacity without sacrificing space for sufficient powder to deliver the payload at game-dropping velocities. Our powders are specifically selected to deliver the most effective velocities and to reduce unburned powder residue.

### REMINGTON® WETPROOF™ PRIMER AND CRIMP SEAL

Totally protects powder, pellets, and ignition system from exposure to the elements

### REMINGTON® STEEL SHOT CUP/WAD

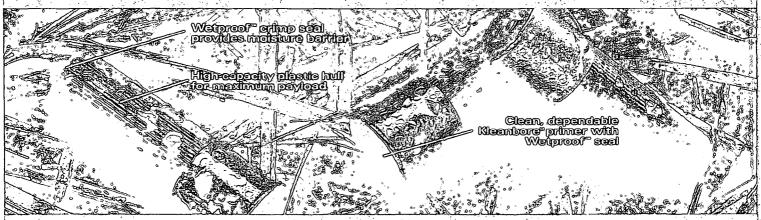

Specially designed high-density polyethylene shot container seals powder gases for maximum velocities and protects barreleftom abrasion and scoring

### Nitro-Steel Magnum Shotshells

HIGH-BASE SHOTSHELLS

# Remington<sup>®</sup> Magnum Shotshells — The Muscle and Payloads to Fill Your Patterns and Your Limits.

### SP DUPLEX® MAGNUM SHOTSHELLS

Duplex is our exclusive shell with two different shot sizes carefully layered one on top of the other. When ranges ary, they combine retained energy and penetration from the larger pellets with pattern density from the smaller ones. Duplex• patterns are also superbly balanced. And to keep them hidden from wary eyes, they have black heads and low-visibility olive drab hulls. If gobblers are your game, stock up on these copper-plated, buffered magnum shells early, because turkey hunters clean 'em off the shelves fast!

### PREMIER® MAGNUM TURKEY LOADS

Remington Premier Magnum Turkey Loads are the most powerful turkey loads you can buy, providing that extra edge to reach out with penetrating power and dense, concentrated patterns. Our magnum-grade, Copper-Lokt® shot is protected by our Power Piston® wad and cushioned with special polymer buffering. Available with some of the heaviest payload of 4s, 5s, and 6s on the market, in "super magnum" 12-ga, and 10-ga. shells and regular 12-ga. 3" and 23/4" magnums. Also available in 20-ga, with 114 ozs, of No. 6s.

### NITRO MAG® BUFFERED MAGNUM SHOTSHELLS

The original buffered magnum shotshells from Remington. The shot charge is packed with a generous amount of shock-absorbing polymer buffering and surrounded by our patented Power Piston® wad to protect the specially hardened shot all the way down the barrel for dense, even patterns and uniform

shot strings. The heavier payload in all Nitro Mag<sup>®</sup> general-purpose shotshells provides the pattern power for everything from turkeys to late-season pheasants.

### EXPRESS® EXTRA LONG RANGE SHOTSHELLS

Our Express® shells are the traditional, high-base, hunter's choice for a wide variety of game-bird applications. They are available in an exceptionally broad selection of loadings, from 12-gauge to .410 bore, with shot size options ranging from BBs all the way down to 9s — suitable for everything from quail to large, flushing pheasants. All have our exclusive Power Piston® wad to cushion and protect the shot and seal the gas behind the shot column to deliver maximum energy and tight, even patterns.

### LOW-BASE FIELD LOADS/PROMO SHELLS

### Remington<sup>®</sup> Upland Shotshells — First in the Field.

### PREMIER® FIELD LOADS

There are times and challenges that call for the finest field loads available. Remington Premier® Field Loads were designed for them. Every component is the best we make, without compromise—a mid-height brass cap for strength, extra-hard lead shot with Copper-Lokt® plating for pattern perfection, and additional shot protection and tight gas sealing from our Power Piston® one-piece wad. Each load is assembled with a well-balanced powder-to-shot-charge ratio. In both 12- and 20-gauge.

# Remington. Shurshot SHURS HEAVY Our 12Loads coalent with considers

### SHURSHOT® HEAVY FIELD AND HEAVY DOVE LOADS

Our 12-gauge ShurShot<sup>®</sup> Heavy Field Loads combine a 3<sup>1</sup>/<sub>4</sub>-dram powder equivalent with a 1<sup>1</sup>/<sub>4</sub>-oz. shot charge — long considered to be the best-balanced, best-patterning upland field load by savvy hunters. ShurShot<sup>®</sup> Heavy Dove Loads are designed to combine sufficiently dense patterns with light recoil for effective.

high-volume, small-bird hunting. Made in 12- and 20-ga. in choice of No. 6, 71/2 and 8 shot.

### RIMFIRE

# Remington® .22 Ammunition — The Smallest Caliber with the Highest Quality.

### FROM TIN CAN PLINKING TO ONE-HOLE PERFECTION...

Whether it's plinking or small-game hunting, getting young shooters started, or keeping match shooters winning, Remington's rimfire quality stands tall. And in 1997, Remington is introducing a complete new line of .22 Win. Mag. ammo with three different bullet choices, and performance on game and on paper that will make centerfire shooters take notice.

### Premier® .22 Win. Mag.

33-gr. polymer tip bullet delivers minute-of-angle accuracy, plus flat trajecto-ry and explosive expansion for small game hunting to 150 yds - performance similar to small-bore centerfire!

Premier .22 Win. Mag., 10 shots, .9", 100 yds.

.22 Win. Mag. PSP
With controlled expansion, exclusive 40-gr,
pointed soft point works well for tougher
small game out to 100 yds. Great for allaround target shooting and plinking.

22 Win. Mag. JHP 40-gr. jacketed hollow point for quick expansion on small game at short range, and rapid energy transfer on metallic silhouette targets.

\* New For 1997

BLACK POWDER

### Remington® Black Powder Ammunition — Designed for Today's Black Powder Shooters.

Remington means great bullet design. In 1997, we're introducing Premier® Copper Solid™ bullets with sabots for black powder, providing an unmatched combination of accuracy and game-stopping effectiveness. And we've developed new No. 10 and 11 percussion caps with dramatically improved ignition capabilities.

### PREMIER® COPPER SOLID" **BULLETS WITH SABOTS** Encased in a .50-caliber sabot, the deep

hollow point cavity and spiral nose cuts of the .45-caliber Copper Solid bullet deliver optimum penetration, virtually 100% weight retention, and nearly 2x caliber expansion. You can't get a better combination of accuracy and on-

### PREMIER® GOLDEN" LEAD ROUND BALLS

Remington has taken extra steps to assure the spherical concentricity and consistent uni-formity of these round balls both size and weight. They are cold-swaged with no sprues or voids. Special and maximum expansion.

etration And brass plating creates cleaner han-dling and reduced barrel leading. They're available in eight caliber choices from .32 to .58.

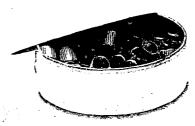

Reliable in all weather conditions, these new No. 10 and 11 percussion caps generate up to 40% more flame volume. The #11 cap has been dimensionally shaped to fit more snugly on the nipple, and both sizes feed reliably through Remington Capmaster and other standard cappers.

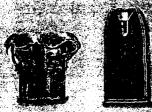

100 No. 11 Percussion Caps

### GAMEMASTER™ BULLETS Remington isn't a newcomer to muzzleloader

bullet production, but an experienced old hand returning with the most advanced technology. he design and performance of these newly developed bullets show the results. Each one is uniformly pre-lubed for cleaner handling, easier loading and minimal barrel leading. They are sized for barrels of .45 to .58 caliber, in bullet weights from 285 to 535 grains.

### GAMEMASTER" MUSH PERFORMANCE

Thick-walled nose design and special alloy lead construction promotes complete mushrooming with high weight retention

BLACK POWDER

### Remington® Black Powder Accessories — The Tools You Need to Stay on Top of the Game.

Remington has developed a broad selection of loading, shooting, cleaning, and maintenance items to meet every need of percussion and in-line muzzleloader shooters, including three types of camo-pattern bags for easy field transport. It's truly everything you need to make muzzleloading easier.

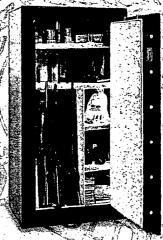

SECURITY PROTECTION SYSTEMS

# Premier™ Series Safes — Unmatched in Quality, Construction, and Appearance.

### PREMIER™ SERIES

In terms of design, construction, and appearance, these/are the finest safes in our line. All have double-wall construction with a body of 3/16" steel.: A fully recessed 1" door and inte nal ball-bearing hinges offer potent insurance against forced entry. Contents are fire-protected up to 1200°F. Additional fire protection on Triple- and Quad-Wall-equipped versions is provided by our Palusol® fire-seal gasket. A Sargent Greenleaf lock with 1" chrome-plated locking bolts secure the door. Backed by extensive, drill-resistant hardplate, or fail-safe triple relocking system provides additional protection against torching, hammering, drilling, and punching The three-spoked handle and dial are 14K gold plated for both beauty and durability. Inside, mildew-resistant nylon carpet ing adds a handsome touch. For 1997, we've added the options of a luxurious velour fabric interior and attractive wildlife prints reproduced from the Remington art collection. See page 57 for full details.

All Premier, sefes feature: U.L. security rating, "Uni-Body" door, laboratory-tested double fire protection, optional velour interior, internal hinges, 1" locking bolts, S&G bank-type locks, drill-resistant hardplate, "Auto-Fire" relockers, shielded bolts, Remington logo, and a limited lifetime break-in warranty.

### Classic™ Series Safes — The Perfect Balance of Quality and Cost.

### CLASSIC SERIES

Our Classic™ safes provide a perfect balance of quality and cost by incorporating many of the features found in our Premier" safes at a more moderate price. Features include: Sargent & Greenleaf combination locks; up to 14 active 1" diameter chrome plated door bolts; three relocking devices; internal ball-bearing hinges; tight-fitting 1/4" recessed door; and 1/4" hardplate behind the lock and door bolts. The safe body is constructed of 10-gauge steel plate with attractive, 14K gold plated 3-spoke handle and combination dial equipped with key lock. All Classic safes have our quiet, easy-retracting bolt guides. Interiors are fitted with plush, moisture-resistant carpet. Fire protection options include Double-, Triple-, and Quad-Wall construction with Palusol® fire-seal gasket. Each one is backed by a limited lifetime break-in warranty, and is available in a choice of four sizes to fit your specific needs and available space. New for 1997 is the option of beautiful four-color wildlife prints from the Remington art collection. See page 57 for full details.

# "Trophy" Series Safes — Full-Size Capacity at a Moderate Price.

### "TROPHY" SERIES

the new full-size, moderately priced "Trophy" series. The "Trophy" comes in a choice of three different sizes and has a seamless body of '/e" steel plate. The close-fitting '//e" recessed door has internal hinges and eight 1" locking bolts. Each safe is equipped with a reliable Sargent & Greenleaf combination lock. A 14K gold plated dial with brass plated handle and key lock is standard. Also available are many of the additional options offered with other Remington safes, including Double- and Triple-Wall fire protection, as well as four interior shelving arrangements and two color choices. The outer surface has a high-gloss paint finish in choice of three colors, and is decorated with a single gold pinstripe and Remington logo. See page 57 for full details.

### Sportsman™ Series Safes — Proven Protection at a Practical Price.

### SPORTSMAN™ SERIES

At a practical, economical price, the Sportsman" series has proven anti-entry devices that include a Sargent & Greenleaf combination lock, multiple relockers, internal ball-bearing hinges, generous hardplate backing, and a \$\frac{3}{16}\text{\*\*}\text{-thick}\$, snugfitting recessed door. The seamless body is made from \$\frac{1}{6}\text{\*\*}\$ steel: Interiors come in a variety of optional arrangements to match your specific storage needs. The outside is finished in attractive, textured black enamel with single pinstripe and Remington logo. The door handle and key lock dial now have an attractive chrome finish. A choice of many optional features provides additional flexibility to further custom-tailor the Sportsman" to your individual requirements. New for 1997 is a gray fabric interior, and the option of Triple-Wall fire protection construction.

### Remington® Safes Omega Point Lab-Certified Fire Protection.

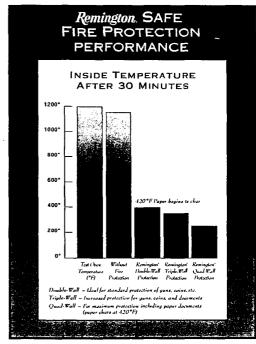

Our Quad-Wall fire protection package is one of the finest available, meeting Omega Point Laboratories' fire-rating certification for protecting fire-sensitive paper items. It consists of two continuous ½"-thick layers of U.L.-listed fire code "C" insulation sealed between the safe's inner and outer walls. The door is insulated with a 5/8"-thick U.L.-listed fire code "C" fireboard, and a 2½" dead air space. And all Quad-Wall models are equipped with the added protection of a

Palusol® fire-seal gasket. Abnormally high surface temperatures cause this unique sealant to expand and seal off all areas of the door jamb. When tested at 1200°F for 30 minutes, inside temperatures never reached 350°F — well below the 420°F at which paper begins to char.

Triple-Wall construction provides proven fire protection at a modest price. Now available on all Premier™, Classic™, "Trophy," and on all Premier™, Classic™, Sportsman" safes. We install two continuous layers of U.L.-listed 5/8" insulation, and the Palusol® fire-seal gasket.

Double-Wall fire protection consists of a continuous  $^{5}/_{8}$ "-thick layer of U.L.-listed fire code "C" insulation on all six interior surfaces, including the door. Contents are protected from up to 1200°F for 30 minutes — more than enough protection from most home fires. This type of protection is ideal for firearms, coins, and similar items.

### A WIDE CHOICE OF OPTIONS FOR INDIVIDUAL PREFERENCES AND NEEDS

On all Remington safes, you can choose from a wide variety of options for additional convenience and storage flexibility.

### SHELF PISTOL KIT

This acrylic rack is available in four- and eight-gun configurations, and fits the shelves inside the safe.

### **DOOR-MOUNTED** PISTOL RACK

Stores hand guns on the inside door panel of any Remington safe, allowing easy access while saving shelf space. Kit will mount up to 16 handguns, depending on the size of the safe door. (Customer installation required).

### BRASS LAMP

Here's a classy and convenient accessory for your afe. This desk-style brass lamp illuminates safe contents when door is opened.

### ELECTRIC DEHUMIDIFIER

An optional feature on all Remington safes is a U.L.-listed dehumidifier. This will provide firearms and other ferrous metal items with continuous anti-rust protection and prevent deterioration of valuable papers particularly in the presence of high outside humidity.

### INTERIOR DUPLEX OUTLET

An option on all Remington safes, this internal electrical outlet provides extra convenience for use of internal lighting and other items such as electric dehumidifiers.

ELECTRONIC DIGITAL LOCK
A unique 9-digit high-security
electronic lock enhances the protection of the combination lock with pushbutton convenience. The telephone-type key pad allows you to unlock your safe as easily as dialing a phone number. It provides a virtually unlimited variety of number and letter combinations:

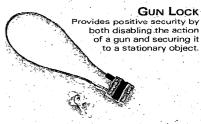

### KEY LOCKING DIAL

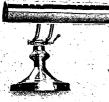

Standard on all models, the key lock secures the combination dial so that it can not be turned unless released by the key.

### PALLET COVER

For the convenience of leaving your safe on a movable pallet, we offer a variety of cover sizes that will convert any standard pallet into an attractive base for your safe.

Make doubly sure your firearms can't be used without your knowledge by using this convenient, easy-to-work trigger block. Interchangeable keys are available for securing multiple

HIGH-PERFORMANCE KNIVES

# Remington® Grizzly™ Lockbacks — The "Magnum" of Folding Knives.

It's hard to find a tougher, more versatile knife than our Grizzly. Though compact, it opens up and locks to the size and strength of a large fixed-blade knife. Rugged Kraton handles provide a non-slip grip for tough outdoor jobs. All two-bladed knives in the series feature an individual locking system for each blade.

ATS 34 Steel is a tool steel so tough it is normally used only by custom knife/makers. It stays sharper and holds an edge longer than other stainless or carbon steels. Our high-performance ATS knives have 3 % blades, a Scotchbrite finish, and thumb serrations on the rear blade top. Handles are made of Virtually indestructible Kevlar - impregnated nylon with scalloped finger grips and handy lanyard hole Each knife comes with a rugged black leather sheath.

SPECIALTY KNIVES

### Sportsman™ Knives -State-of-the-Art Materials in Traditional Designs.

These fixed-blade knives feature blades of 440A stainless steel, set in a variety of handle designs and colors to meet any need. (Note: All Sportsman™ fixed-blade knives available in box or clampack pack-

### The Remington Shooting School . Where You Will Become a Better Shooter.

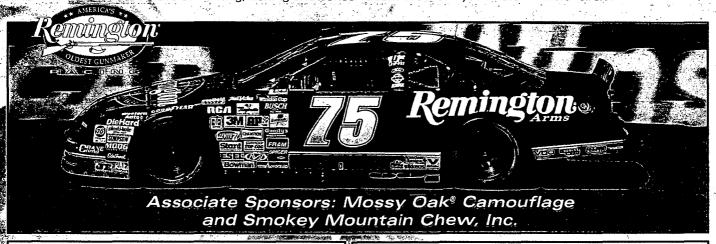

There are no secrets to being a top shotgunner, just proven techniques that work if someone shows them to you. That's the purpose of the Remington Shooting School. Remington's with method of instruction provides shooters with solid recall of what they have learned... Reading the target, Eye contact and Movement. Whether your interests are

trap, skeet, sporting clays or wingshooting; the Remington School will help you develop and perfect your own natural abilities while enjoying a top-flight program. Our school is staffed by experienced NSCA-certified instructors and guest clay-target champions. A comprehensive 3-day program will cover every shooting technique, proper gun fit and choke selection, as well as other important factors such as proper eye focus and mental attitude. The school has locations in upstate New York and Orlando, Florida, and our new expanded program will take the Remington Shooting School on the road. Our 3-day all-inclusive, value-packed, instructional program offers you fun, fine food, first class accommodations, and unlimited targets and ammo. Classes are limited and filling fast. so call for additional information, locations and dates at 1 (800) 742-7053.

### Remington Racing™ — Join Us In The Hunt For The NASCAR Winston Cup Trophy!

In 1997, we're shooting for trophies of another kind - NASCAR Winston Cup Series wins with car #75 - the Remington Bullet: By teaming up with Butch Mock Motorsports, driver Rick Mast, and crew chief Gere Kennon, we will continue to introduce millions of race fans to "Remington Country" through NASCAR Winston Cup Racing - the fastest-growing spectator sport in America. Going racing is a natural fit for us - Remington Arms is America's oldest gun company, and NASCAR fans share our love of hunting, fishing and conservation. We'll see you in the winners' circle!
