As the use of the word "cancer" in all the cases above is not consistent, we have modified the word "path" to "epidemic" for all cases except the last one. The last case is included for showing progression and evolution of the outbreak, and therefore was included. In the other cases, the word "epidemic" was used to indicate the spread of the disease, and the word "cancer" was used to indicate the progression of the disease, including the word "cancer" in the word "epidemic".
