1. The first group of people who are not in the labor force are those who are not in the labor force because they are not in the labor force.

[illegible][illegible][illegible]

Figure 1. The effect of the number of trials on the number of correct responses. The number of correct responses (Y-axis) is plotted against the number of trials (X-axis). The data points are connected by lines, and the error bars represent the standard error of the mean. The number of correct responses increases with the number of trials, and the rate of increase decreases as the number of trials increases.

Figure 1 is a schematic diagram of the experimental setup. It shows a top-down view of a rectangular arena with a central circular area. A subject is positioned at the top, facing the arena. A video camera is positioned above the arena, pointing down. A scale bar is shown at the bottom right. The arena is divided into several regions, with labels indicating the positions of the subject, the camera, and the scale bar.
