Importance: High
Sensitivity: Confidential

Ron,

As requested we have reviewed this program with Diaz's group and Mayfield and have put together a test plan to qualify this product for production. The short action utilizes the same parts as the existing M/710 with the following exceptions:

PART DIFFERENCES

- * Magazine Box
- * Magazine Follower
- * Magazine Box Bottom
- * Receiver Insert
- * Support Bracket
- * SPL Fire Control
- * Magazine Box Spacer

Changes to the stock tool will be required to add additional clearance for the safety arm/button and the fire control housing. The receiver rear diameter that accepts the new insert will also be different (larger) than the existing M/710.

Subject to Protective Order - Williams v. Remington
