Dear Mr. Ungerman,
Thank you for your inquiry. We have a Safety Modification Program on
certain model bolt action rifles. This is a voluntary program, it is not a
recall. This is designed to remind people of the existence of the
bolt-lock feature and to offer customers the opportunity to modernize
their products.

You can read more information regarding our firearms and our Safety
Modification program through the front page of our website or the link
below:

http://www.remington.com/safety_modification_program/remington_safety.htm

The safe use and performance of your firearm depends on correct assembly
and routine maintenance, as well as adherence to the "10 Commandments of
Firearm Safety." <http://www.remington.com/support/10comm.htm> It is
critical that you familiarize yourself with the information in both the
owners manual and safety booklet. Whether you are a veteran shooter with a
collection of Remington firearms, or a first time shooter, take the time
to review this important literature and be certain that you are practicing
firearm safety!

If you have any questions, please feel free to contact us at
1-800-243-9700 or 1-877-387-6691.

I hear there is a safety recall on this gun that allows you to open the
bolt while the safety is still on. What can you tell me about this, and
how do I go about getting this modification done?
