National TV News on 03/06/02 carried statement Remington was recalling Bolt Action rifles. Can you provide model and serial numbers affected, how recall is to be handled and what part or parts are affected by the recall. Also timing for those owners affected by the recall. I own several rifles of your make and am concerned from the safety standpoint regarding their continued use. Thank you for your assistance. Sincerely, Margaret W. Ferris

Dear Ms. Ferris,
Thank you for your inquiry. We have a Safety Modification Program on certain model bolt action rifles. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products.

You can read more information regarding our firearms and our Safety Modification program through the front page of our website or the link below:

http://www.remington.com/safety_modification_program/remington_safety.htm

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691.

Customer (Jeffrey Daniels) 3/8/2002 8:01:58 AM
Is it possible to order a factory installed muzzle break on a model seven 7mm mag ss. If so, how much do they typically run? Also, are there other color synthetic stocks available for that gun other than black???

Thanks,

Jeff
