Dear Mr. Brown,

Thank you for your inquiry. We have a Safety Modification Program on certain model bolt action rifles. This is a voluntary program, it is not a recall. This is designed to remind people of the existence of the bolt-lock feature and to offer customers the opportunity to modernize their products.

You can read more information regarding our firearms and our Safety Modification program through the front page of our website or the link below:

http://www.remington.com/safety_modification_program/remington_safety.htm

The safe use and performance of your firearm depends on correct assembly and routine maintenance, as well as adherence to the "10 Commandments of Firearm Safety." <http://www.remington.com/support/10comm.htm> It is critical that you familiarize yourself with the information in both the owners manual and safety booklet. Whether you are a veteran shooter with a collection of Remington firearms, or a first time shooter, take the time to review this important literature and be certain that you are practicing firearm safety!

If you have any questions, please feel free to contact us at 1-800-243-9700 or 1-877-387-6691.

I had a customer to bring in this rifle to be checked out. He had see 60 minutes on the recalls of these rifles about them going off with safty on are off and that Remington was recalling these guns. I would like to know more about this and are these guns being recalled? I have checked

his gun out and the set screws are tight and the gun will not go off with the safty on everything is tight on this his gun.

Please let me know something on the recalls.

Brown's Gunsmith
