Dear Kevin,

Thank you for your inquiry. The design of the parts for the Model 788 are different than that of the 700. However if you would like to send your firearm in to us we will be happy to check it for function and safety. You can find shipping instructions through the front page of our website.

Could you please give me a definite answer I understand they are 2 different guns. But is the problem not in the fact that you have to take the safety off to unload the gun?? which with my gun you do.
