Dear Mr. Nerviani,  
Thank you for your inquiry. We are offering a Safety Modification on  
certain bolt action rifles including older model 700 rifles. This is a  
voluntary program, it is not a recall. This is designed to remind people  
of the existence of the bolt-lock feature and to offer customers the  
opportunity to modernize their products. We strongly recommend that you  
take advantage of this offer.

You can read more information regarding our firearms and our Safety  
Modification program through the front page of our website or the link  
below:

[http://www.remington.com/safety\\_modification\\_program/remington\\_safety.htm](http://www.remington.com/safety_modification_program/remington_safety.htm)

The safe use and performance of your firearm depends on correct assembly  
and routine maintenance, as well as adherence to the "10 Commandments of  
Firearm Safety." <http://www.remington.com/support/10comm.htm> It is  
critical that you familiarize yourself with the information in both the  
owners manual and safety booklet. Whether you are a veteran shooter with a  
collection of Remington firearms, or a first time shooter, take the time  
to review this important literature and be certain that you are practicing  
firearm safety!

If you have any questions, please feel free to contact us at  
1-800-243-9700 or 1-877-387-6691.

I was advised from a T.V. bulletin that some Remington Bolt action rifles  
built before 1982 may have a problem with their safety? I own a 1971 Model  
700 BDL (6mm caliber) rifle and was wondering if I need to be concerned  
with this issue. Thanks.
