Response (Laura)

Dear Mr. Chavez,

Thank you for your inquiry. The average turn around time for the safety modification program at our factory is 2-4 weeks.

Customer (tim Napierski)

I have a 1100, It just says special not special field. It has a staight stock and a very short Fixed barrel improved cyl. about 21 inches. 5 round capacity. Im wondering when it was made and any information about it would be helpful. Im at work and dont have the serial number handy sorry
Tim
