

Remington Arms Technical Center

Project Name: New Auto Rifle
Project Number: 241403
R&D Engineer(s): Jeff Stone, Will B James

Revised: 5/12/05

Marketing Manager: John Trull
Plant Contact: ?

Status:

- Received a more traditional stock from Boyd's.
- Based on initial prototype, redesign/rework of specific parts completed.
- Ordered components for EET guns.
- EET gun build by mid May.
- Marketing reviewed the non functional prototype. A number of changes were made.
- Received changes to stock from Boyd's Gun Stocks based on Marketing's input.

Issues:

1) Marketing would like a standard contour barrel for this magnum rifle. EET prototypes will incorporate the heavy magnum contour barrels. The R&D Research group will investigate the potential pitfalls of migrating to the standard contour for a magnum caliber.

Action Items:

Action Item	Status	Responsible	Date
1. Order EET components	Complete	R&D	3/25/05
2. Marketing Review of non functional prototype	Complete	MKT/R&D	3/8/05
