Dear Bernard, We appreciate your interest in Remington products. With the serial number you provided, your firearm was produced in 1968. Unfortunately, we no longer offer barrel assemblies for this model. In 1979, Remington instituted a recall for the Model 600 and 660 rifles made before February, 1975. Please refer to the link below for details on this recall and for assistance with returning the firearm for evaluation. http://www.remington.com/Safety_Modification_Program/remington_safety.htm

I would like to know the approx. age of this rifle and, if it is possible to replace this short barrell with a longer one?
