Thank you for visiting Remington Country. According to the information that you provided, your Remington Model 700 was produced in or around 1974. The Remington Model 700 was introduced in 1962 and replaced the Model(s) 721 and 722. The Model 700 is known as the "most accurate out of the box production rifle" on the market today. We would suggest that you review the section under "Bolt Action Safety Message: Safety Modification Program for certain pre-1982 rifles" found on our homepage.

Please check with your dealer about the availability of the conversion kit for your muzzleloader. We have been shipping those in large quantities for the last several months.

I have a model 700 .243 cal. that I would like info. on. Was this gun a part of the recall i heard about last summer? And could you tell me what year and exact model i have? IS IT A COSTUME DELUXE, OR A VARMIT SPECIAL? Any help you could give me would be appreciated. also want to convert my 700ML to the 209 primer. cannot find the conversion kit in the parts listings. have been trying to order through retail stores but they seem to be on back order.

thank you
