Dear Claude,

Thank you for your inquiry. The 700 Classic was chambered in 280 in 1997. The bolt lock safety mechanism was on all pre-1982 firearms. I have provided a link below that will give you information on what calibers and what years we made them in. I really don't have any technical information such as specs on it.

Thank you for your continued support of Remington products and thank you for visiting Remington Country!
