Dear Mr. Spencer,

Thank you for contacting Remington Country. Your Model 700 was produced around 1971. Please read the important safety information at:

[http://www.remington.com/Safety\\_Modification\\_Program/remington\\_safety.htm](http://www.remington.com/Safety_Modification_Program/remington_safety.htm)

I simply want to know when the gun was made. It has the old style stock and short bbl. The stock is the slender forearm type with the feathery type of engraving. The gun also has the old bolt lock safety feature as well.
