Thank you for contacting Remington Country. We will need your serial number to check for any recalls on your particular firearm.

Your rifle may have been originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

Is there are recall on Rem 700BDL rifles?

I have an old Rem 700BDL from my grandfather that has trigger/safty issue.
