Dear John:

Thank you for visiting Remington Country. According to the information that you provided, your Remington Model 700 was produced in or around 1968. We do not have production totals for specific calibers. The Model 700 was introduced in 1962 and is still in production today. This model is widely recognized as the "most accurate out of the box production rifle" on the market today.

We would encourage you to review the information on our homepage about our Safety Modification Program that would include your gun.

I am elated with my new rifle? New for me!

Prior owner states that he owned for at least 20 years. Doesn't recall when or where he purchased rifle.

Can you advise when this rifle was manufactured or shipped from factory?

Do you have service that provides such information?

Thanks for your consideration.

Regards,

John
