Dear Mr. Sickafuse,

Thank you for contacting Remington Country. Certain Model 600 rifles have been recalled. In order to determine if your rifle has been recalled and has not already been serviced, we will need the serial number located on the left-hand side of the firearm. If it had already had the trigger replaced or repaired it will have a "V" stamped on the trigger.

Also, your rifle may have been originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:
