

I just found the Safety Message article on the bolt-lock modification in a magazine from 2002. Is this still being offered? Does my Model 700 need this modification? If Remington is not still providing this modification under safety regulations, where can I get it done?

Discussion Thread

Response (Rena)
Dear Maurice,

Thank you for your inquiry. You could please e-mail me the serial number of your firearm. Then I can go into further detail with the Safety Modification Program.

Thank you!
