Dear Mr. Hines,

Thank you for contacting Remington Country. Your Model 660 was produced in 1978 and was not included in the trigger recall.

Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

http://www.remington.com/Safety_Modification_Program/remington_safety.htm

My father died earlier this year and left me the above referenced rifle. In his other belongings, I found a letter he wrote your company, but never mailed, inquiring if a recall was issued concerning the trigger assembly of this specific firearm model.

Please tell me if such a recall was issued and if so, what I need to do to ensure the safety and functionality of this rifle.

My sincere thanks,
Robert M. Hines
