Thank you for contacting Remington Country. Your Model 700 was produced in 1969. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

I was given this rifle several years ago as a gift and I have just learned of the safety recall for certain model 700 rifles. It is chambered in 6mm. I have enjoyed target shooting and hunting with it very much. Also can you tell me when the rifle was manufactured. And is it subject to the safety recall. With the safety on, I can not open the bolt mechanism to unload the rifle.

Thanks for you assistance.

William Sellers
