Dear Mr. Gragg,

Thank you for contacting Remington Country. Your Model 700 was produced in 1979. Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

http://www.remington.com/Safety_Modification_Program/remington_safety.htm

I have experienced a firing when I chambered a round. The safety has to be off on my rifle to do this. On your newer models the safety is on. Is there a way to change my rifle to this?

thank you

Teddy gragg
