Dear Don:

Thank you for visiting Remington Country. According to the information that you provided, your Remington Model 700 was produced in or around 1968. We do not have production totals for specific calibers. The Model 700 was introduced in 1962 and is still in production today. This model is widely recognized as the "most accurate out of the box production rifle" on the market today. We would suggest that you review the information found on our homepage in the Safety Center entitled "Bolt Action Safety Message: Safety Modification Program for certain pre-1982 rifles".

I just bought a model 700 in 222 Remington, it had a unertyl scope on it. the scope company informed me that the scope was made in 1962-1963. Can you tell me how old this rifle is? serial number #258xxx

p.s. the safety knob looks weird, kind of flat on two sides?
