Dear Dana, Thank you for contacting Remington Country. Remington issued a voluntary program to convert older model rifles with a bolt lock system to a non bolt lock system. This allows the user to unload the firearm while the safety is kept in the "s" or "On Safe" position. The operation of your firearm will not otherwise be affected. All of our bolt action rifles have had this design since 1982. Please see the link below for more details on this program and on your rifle specifically.
http://www.remington.com/Safety_Modification_Program/remington_safety.htm

As with any used / previously owned product we would suggest allowing one of our authorized repair centers listed below evaluate the firearm for safety and function and to complete the modification if you so desire.

Midwestern Shooters Supply, Inc.
191 Church Street
PO Box 26
Lomira, WI 53048
Phone: 920-269-4995

River Bend Sport Shop
230 Grand Seasons Dr.
Waupaca, WI 54981

I'm having problems sending you an e-mail so I'll use this address.

I have a model 721 that my father gave me. Serial number-257606. I've been using it for years. There is a recall on this rifle for safety reasons.

Can I take it to Gander Mountain in Wausau, Wisconsin to have the recall work done? They just rebuilt and have an extensive gunsmith shop and a big new building. If not is there any place local?

Is my rifle safe?

Thanks.
