Dear Haila,

Thank you for contacting Remington Country. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

http://www.remington.com/Safety_Modification_Program/remington_safety.htm

I have an older 700 ADL 270. The safty must be taken off to unload the bullets. Is there a modification to where I can leave the safty on while unloading? What are your recommendations to this issue? Thank You.
