Customer (Phillip Amaro) 1/29/2004 11:14:04 PM
I have a 700BDL I bought it new from a friend in the late 70s OR early 80s now when you release the bolt it will fire the shell. If you do it with the safety on its ok till you release the safety. I was told that these older models were having this problem and that remington would fix it ,if this is true I would like information on this. I live in Lawrence KS.
Thank You Phil
