Customer (Richard Hobbs) 2/16/2004 8:13:00 PM
Good Evening,

I own a Model 700 that was purchased in 1977 (approx) it has been in my family ever since. This is a great gun that has discharged when safety was moved from on to off position. It has also fired when bolt was closed seating another round. Rifle has had less than 200 rounds through it. We are a family of satisfied Remington users and would like some direction on how to rectify this problem. Any help or direction you can offer would be greatly appreciated.

Sincerely,
Richard Hobbs
