Subject: Notes on Mayfield/Etown discussions 4/26/05

Since there may be still be confusion on the direction of the M710 Short Action. We would like to set up a meeting with Mayfield on Friday the 29th around 9:00 or 10:00am CT in Mayfield for about 1 hour or when ever it is convenient. Please let me know ASAP.

Notes on Etown and Mayfield meeting on 4/26/05.

Mayfield and Etown discussions on 4/26/05 included the current DCR, transmittal process and possible improvements of the system plus two (2) developmental projects: (1) the 710 short action and (2) converting the long action to use the new fire control (SPL)

DCR's

- 1) Mayfield to sign-off on DCR's (system to be worked-out)
- 2) PDF files to be transmitted
- 3) Mayfield to get with Ilion about control of Ilion parts used in Mayfield

Link to Current Parts List by Model:

Ilion parts list:
Remington\Inengfs\partslist <file:///Remington\Inengfs\partslist>

Mayfield Production Drawings:
Remington\etownadc1\Production <file:///Remington\etownadc1\Production> Drawings

Project Discussion:

A) Discussed the status of the M710 Short Action project with different options.

- 1) The M710 short & long action designs will incorporate the new fire control (SPL). If the new fire control (SPL) is not ready for production within a reasonable timeframe we will use the current M700 Fire Control in the M710 Short Action.

Subject to Protective Order - Williams v. Remington
