Dear Mr. Cox,

Thank you for contacting Remington Country. We will need to know what model rifle you have and the serial number to check for possible recall.

Your rifle may have been originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

I bought a Remington 30.06 in 1977. I was told at Uncle Lee's in Central City KY that there was a recall on it when I was asking its current value. Was there a recall?
