Dear Ms. Spence,

Thank you for contacting Remington Country. This Model 700 was produced in 1973. This rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if he would like his firearm converted, so that he can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

[http://www.remington.com/Safety\\_Modification\\_Program/remington\\_safety.htm](http://www.remington.com/Safety_Modification_Program/remington_safety.htm)

It will need to be sent to a Remington Authorized warranty center.

I am a gunsmith in Libby Mt - customer has brought in a Model 700, cal .270, serial #6658550.

He is asking about the safety modification program - is this one of the guns that needs this done and if so, can we do it or does it need to be sent to a authorized Remington repair station?

Thx.
