Dear James,

Thank you for your inquiry. We don't have an exact date, but your gun was made sometime during the 1970's. If you put the gun on "safe" & you cannot lift the bolt---then you have the old style with the bolt lock on it. This was not a recall. We are offering an optional update to the consumer to have the bolt lock removed so that you can open the gun when it is in the "safe" position. There is a charge of \$20.00 to have this done.

We recommend taking/shipping the firearm to the following Remington Premier Repair Center for inspection.

Paducah Shooters Supply, Inc.
3919 Cairo St.
Paducah, KY 42001
Phone: 270-442-3242
Fax: 270-442-5022

You can find additional Remington Warranty Centers for the US and internationally at the following section of our site.

I own a 700 BDL Serial # A6869868. Can you advise me if it falls under the bolt -lock mechanism recall?
