Dear Mr. Bay,

Thank you for your inquiry. His Model 700 was produced in 1977. This firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

My son owns a Model 700 30-06. I recall the safety problem reported by CBS "60 Minutes" and wonder if there had ever been a recall on this model? If not, should he have a gunsmith check it?
