Dear Chris,

Thank you for visiting Remington Country!

According to the information that you provided, your Remington Model 700 was produced in or around 1975. We do not have production totals for specific calibers. The Model 700 was introduced in 1962 and is still in production today. This model is widely recognized as the "most accurate out of the box production rifle" on the market today.

We do not call back on your firearm.

As with any used firearm, we would strongly recommend you have the firearm serviced and evaluated by a competent gunsmith for function and safety. We feel it is imperative you know the exact condition of your firearm prior to shooting. Please also read our "Guide to Buying a Used Gun" found through the link below:

<http://www.remington.com/magazine/preview/rc007007.asp>

If you are not aware of a gunsmith in your area, please feel free to contact one of our RARC's found in the Support/Repair section of our website or the following link:

<http://www.remington.com/repairsvc/modelselection.asp>

If you will complete the form located in the What's New/Reading Room section of our website, we will forward to you a copy of the original owner's manual.

<http://www.remington.com/whatsnew/readroom.htm>

We are offering a bolt modification on older firearms such as your model. Please click below:

http://www.remington.com/Safety_Modification_Program/remington_safety.asp

Have a good day!

Customer (Chris McLeod)

Remington Model 700 270bdl Serial# 6803603

Question: Did this model gun have a problem with firing mechanism?? What year was this gun produced??

Thank You
Chris
