Dear Clement:

Thank you for visiting Remington Country. According to the information that you provided, your Remington Model 700 BDL was produced in or around 1971. We do not have production totals for specific calibers. The Model 700 was introduced in 1962 and is still in production today. This model is widely recognized as the "most accurate out of the box production rifle" on the market today. We would suggest that you review the information found on our homepage in the Safety Center entitled "Bolt Action Safety Message: Safety Modification Program for certain pre-1982 rifles".

I just bought a wonderful older model 700 rifle. It is in caliber "30-06 SPRG". It doesn't have a designation on it that I can see (ADL or BDL). The serial number is 6487310. On the left side of the barrel near the receiver is stamped 9 EU 65 (and not very straight I might add). The stock is a simple plain straight back style (Beautiful wood) with a slight cheekpiece on the left side, and a rubber type of butt plate.

Please let me know.

Thank you.
