Dear Michael,

According to the serial number you provided, your Model 721 was made on or about 1956.

You should receive your manual in about 7 business days.

Model 721, serial number 400952

I'm interested in the operator's manual and then will consider whether to submit rifle for "safety modification program." Unloading by working the bolt was never my favorite; compared to separately unloading the magazine.
