Dear Mr. Brock,

Thank you for your patience. By the serial number you provided, your 700 was produced around 1966.

Your firearm has not been involved in a recall. Your rifle was originally installed with a bolt-lock, which means you have to put the safety switch on fire before you can open the bolt. We are offering a conversion at a special price if you would like your firearm converted, so that you can open the bolt at anytime with the safety on safe. To view more details regarding this modification, go to:

I recently obtained an old Remington model 700 in 30/06 that is in new condition. I have been told that a series of model 700's had a recall because the gun would fire sometimes when the safety was engaged. My gun has serial #210765. Please contact me regarding this and advise me if this is a myth or fact. Thank You for the fine U.S.A. made products that are built to last. Randy Brock Owasso, OK
