Dear Denis:

Thank you for visiting Remington Country. According to the information that you provided, your Remington Model 700 was produced in or around 1972. We do not have production totals for specific calibers. The Model 700 was introduced in 1962 and is still in production today. This model is widely recognized as the "most accurate out of the box production rifle" on the market today. We would suggest that you review the information found on our homepage in the Safety Center entitled "Bolt Action Safety Message: Safety Modification Program for certain pre-1982 rifles".

I have a pre 1982 7mm mag, in a 700db1. It has the old take safety off to open bolt. It has gone off on me two times now in all the years. and i had a guy tell me that you are aware of this problem and have a fix for it. i love the gun and still use it all the time but im very careful when unloading it, please advise me as to what i can do. Thank You Denis
