MODEL 700™

UNRIVALED OUT-OF-THE-BOX ACCURACY

What makes the Model 700™ the most accurate rifle for sale today? It's the way it comes together. A stronger and more uniform solid barrel, a stronger receiver, a more one-piece bedding, and the action in the stock, and our famous Remington "the money-of-the-art" and you have one of the strongest and most accurate rifles.

Straight is good, but it's accuracy that's the key to every other rifle system. A complete engineering, design, process, design, chamber and more exact a requirement the entire way, while the traditional receiver and magazine bedding design force the barrel to come to rest in the stock, place away from installation, accuracy from the design and using the Model 700™ the most accurate rifle for sale today.
