

CONFIDENTIAL

To Adjust the Sights

All models with sights are shipped at the factory with a zero at 100 yards.

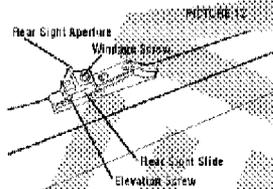

TO ADJUST THE REAR SIGHT:

For elevation (up and down adjustments) and windage (left and right adjustments), move the rear sight in the same direction as you need to move the bullet on the target. See Picture 12.

NOTE: For more information on ballistics and trajectory, see the HMMG IOMP catalog.

TELESCOPIC SIGHTS:

The top of the receiver has holes for the installation of telescopic sights.

Lubrication and Maintenance

NOTE: The chamber should be cleaned before loading and firing the firearm. Do this first. Follow cleaning instructions shown on page 12.

Good lubrication should be applied to all critical parts of Rem[®] O[®] to prevent the possibility of rusting. See note below.

When the firearm is to be stored, it should be carefully cleaned and thoroughly dried. Oil or grease should be wiped with a light coat of Rem[®] O[®] occasionally.

When the firearm is to be re-used, all excess lubrication must be removed. The chamber and bore must be thoroughly wiped dry.

NOTE: Remington Rem[®] O[®] is available from your local dealer, local dealer list or HMMG as a Rem[®] O[®] dealer list or HMMG as a Rem[®] O[®] dealer list.

POSITION ON TARGET	ADJUSTMENTS
	<ol style="list-style-type: none"> Loosen the elevation screw on the rear sight. Slide the rear sight down (downward) on the ramp. Tighten the elevation screw.
	<ol style="list-style-type: none"> Loosen the elevation screw on the rear sight. Slide the rear sight up (upward) on the ramp. Tighten the elevation screw.
	<ol style="list-style-type: none"> Loosen the windage screw on the rear sight. Slide the rear sight aperture to the left. Tighten the windage screw.
	<ol style="list-style-type: none"> Loosen the windage screw on the rear sight. Slide the rear sight aperture to the left. Tighten the windage screw.

TO CLEAN THE BARREL:

WARNING: Check the chamber and magazine to make sure there are no rounds in the firearm.

- Use the instructions and the equipment provided in the good cleaning kit. For recommendations, see your Remington Authorized Gunsmith.
- Select the correct caliber cleaning brush and attach the brush to the cleaning rod.
- Put the cleaning brush into the gun cleaning solvent.
- Push the cleaning brush through the barrel several times.

NOTE: Always clean the barrel from the muzzle to the chamber.

- Remove the brush from the rod. Attach tip with correct size cleaning patch and push through the bore.
- Repeat several times using a new cleaning patch each time until the patch is not dirty.
- Push a clean patch saturated with Rem[®] O[®] through the barrel.
- Push a clean, dry patch through the barrel as many times as is practical.
- Apply a thin coat of Rem[®] O[®] to the outside of the barrel with a soft, clean cloth.

WARNING: After cleaning, make sure the barrel is the correct diameter.
