

- Clay Targets
 - Cammerzell Project
 - Activity terminated by Cammerzell
 - Concerns:
 - High Target Cost- (Due to energy requirements)
 - Couldn't demonstrate acceptable trap breakage rates
 - Large capital required
 - Working with Dayton, OH lab to solve material problems (deformation under high temperature and trap breakage)
 - Expanding in-house Clay Target making capability to eliminate sourcing product
- New Varmint Target Stock (H-S Precision replacement)
 - In design/definition phase — working w/ John Trull and Ilion
- PDM Software conversion from **SmartTeam** to **PdmWorks**
 - Installed – Database conversion in process (saved maintenance \$'s in '05)
- **Other Topics for Discussion?**
 - Etron-X Technology Interest
 - Discussion between Military Products (Ed Schoppman) & MTC Technologies. They're developing a new concept small arms weapons system for a DARPA military contract and want to use Etron-X technology
 - 2nd contact interested in networking Etron-X Guns for group sniper applications
 - Turbex Project (Liquid Stun Gun)
 - Meeting held at E-town on Nov. 2nd-3rd with Greg Foster & Dale Danner
 - Prototype and liquid in E-town
 - Danner is **not** optimistic on technology
 - Testing to commence 2nd week in February
 - SHOT Show for Cook/Franz – THANKS for allowing us to attend
