

14D Peerless Grade and Model 14R Carbine. The Model 14 rifle was chambered for the same ammunition as Remington's Model 8 rifle-- .25 Remington, .30 Remington, .32 Remington and .35 Remington rimless centerfire ammunition.

Remington sold 125,056 Model 14 and Model 14 1/2 rifles and carbines between 1912 and 1935. In 1936 Model 14 firearms were replaced by Remington Model 141 "Gamemaster" rifles and carbines.

***Model 14 1/2**

The Remington Model 14 1/2 Slide Action Sporting Rifle was introduced a year after the Model 14 rifle (1912). Remington's retail price list dated January 12, 1914, offered the No. 14 1/2-A Standard Grade Rifle (with 22 1/2-inch barrel and pistol-grip stock) for \$17.25 and the No. 14 1/2-R Carbine (with 18 1/2-inch barrel, straight-grip stock and saddle ring) for \$16.75. Both were chambered for .38-40 W.C.F. or .44-40 W.C.F. ammunition. The Model 14 1/2 was nearly identical to the Model 14 except for the chambering, barrel length and markings.

Remington sold 71,440 Model 14 and Model 14 1/2 rifles between 1912 and 1919. In all, 125,020 of these rifles were made in the twenty-three years of production through 1934, when they were discontinued and replaced by the Model 141 rifles.

***Model 31**

Remington produced this model from 1931 to 1950. There were nearly 200,000 12-gauge, 16-gauge and 20-gauge shotguns produced during this time period.

***Nylon 77**

The Nylon 77 was a spin-off from the Nylon 66 MB, but it had a five-round clip instead of a tubular magazine. A ten-round clip was optional. The Nylon 77 was produced for only three years, and was last featured in the 1971 Remington catalog. During that period a total of 15,327 rifles were sold. In 1972 Remington brought out a variation of the Nylon 77, renamed the Mohawk 10-C.

***Sportsman 78**

The Sportsman 78 is a Model 700 in every sense of the word. It was introduced during the 1984 model year, though it was not catalogued until 1985. The Sportsman 78 filled the gap left by loss of the Model 788 Remington for an economy grade rifle. The change from the 788 to the Sportsman gave us a single system for its high power bolt action in which much of the wood and metal working machinery and inventory matched. The differences between the 700 ADL and the Sportsman are cosmetic. The bolt handle and stock are slick rather than checkered. The bolt body is not jeweled and the metal finish overall is shy of that seen on the ADL. It is also drilled and tapped for scope mounts and will use the same mounts designed for a Model 700 long action rifle. The Sportsman 78 was offered in .223 Remington, .243 Winchester, .308 Winchester, .270 Winchester, 7mm Remington Magnum and .30-06 Springfield.
