

**POPULAR MODEL 870® EXPRESS® LINE NOW OFFERED WITH
UPGRADED LAMINATE STOCKS AND FORE-ENDS**

Madison, NC – Renowned for its durability and reliability in the field, the Remington® Model 870 Express pump action shotgun is still one of the best values in the marketplace today. For 2006, the widely popular Model 870 Express will feature a sturdy, brown laminate stock and fore-end, enhancing the appearance and durability of this pump gun. This upgrade to the Express wood offerings provides added value to the end consumer.

By combining the more traditional appearance of a wood stock with the weather resistant qualities of synthetic stocks, laminates have gained tremendous popularity. Thin layers of wood are pressed and bonded with resin providing unrivaled strength, added resistance to inclement weather conditions and an enhanced look over traditional hardwoods. The laminate fore-end and stock coupled with the dependability of the smooth-operating, twin action bars; strength of the solid steel receiver and legendary Model 870 handling qualities, makes the Express Laminate offering an exceptional value.

The extensive family of economical Model 870 Express pump action shotguns provides outdoorsmen with a wide range of durable, reliable options for every hunting situation. Please visit our web site at www.remington.com for a complete listing of Model 870 offerings.
