

REMINGTON INTRODUCES VERSATILE LINE OF MODEL 870™ AND MODEL 1100™ TACTICAL SHOTGUNS

Madison, NC Remington is pleased to announce a line of 12-gauge tactical synthetic shotguns in Model 870 pump action and Model 1100 autoloading platforms. These versatile shotguns feature shorter barrel lengths, highly functional stock designs and magazine extensions for multi-purpose use including competitive shooting, personal defense or protection of property. Five durable well-designed models will be offered for 2006.

The **Model 870 Tactical SPEEDFEED® IV Stock** version is available in a **20-inch barrel length with 3-shot extension** or more compact **18-inch barrel length with 2-shot extension**. These fast-handling, pump actions feature the highly regarded SPEEDFEED IV pistol grip stock for true one-hand control and is fit with Remington's recoil-absorbing R3® Pad for added comfort when shooting magnum shells or slugs. The rugged fore-end design provides for secure and smooth operation of the action and both stock and fore-end feature a non-glare, matte black finish. A 3-shot magazine extension tube on the 20-inch model and 2-shot tube on the 18-inch model increase the shell capacity for added versatility. These tactical versions sport a standard profile, carbon steel barrel with single bead sight and fixed Improved Cylinder choke. The sturdily constructed receiver is milled from solid steel and features "870 Tactical" rollmark. Completing the package is OD (Olive Drab) matte finish on the receiver and barrel; rear swivel stud and extension bracket stud; and receiver drilled and tapped for Weaver-style rail. Suggested retail price: \$505.

The **Model 870 Tactical SpecOps™ Stock** version has an **18-inch barrel with 2-shot extension** with standard features of the 18-inch model above. Setting this tactical 870 apart is the adjustable and recoil compensating Knoxx SpecOps pistol grip stock. With an easily-adjustable LOP (length of pull) feature, this pump action can almost instantaneously be fit to any shooter or adjusted to accommodate additional layers of clothing with a LOP from 12 to 16 inches. The SpecOps Stock also utilizes a patented recoil-compensating system with significant reduction of felt recoil up to 95%. Not only does this make shooting more comfortable, but it allows for quicker follow-up shots and less shooter fatigue. Suggested retail price: \$625.

The **Model 1100 Tactical SPEEDFEED IV Stock** version is available in an **18-inch barrel length with 2-shot extension**. This softer-recoiling, 12-gauge autoloader has the sturdy SPEEDFEED IV pistol grip-style stock and fore-end, solidly constructed of durable synthetic materials and finished in a non-glare matte black. The standard profile, carbon steel barrel has a single bead sight, fixed Improved Cylinder choke and OD matte finish. Shotshell capacity of 6+1 is achieved with the 2-shot magazine extension tube and with the addition of an extended carrier release and oversized operating handle reloading is quick and easy. The solid steel receiver is drilled and tapped for Weaver rail and features the OD finish with "1100 Tactical" rollmark. Rear swivel stud, extension bracket stud and recoil-taming R3 Recoil Pad complete this offering. Suggested retail price: \$757.
